## Application for Planning Approval

<b>OFFICE USE ONLY</b>	
DATE RECEIVED:	PID:
FEE	RECEIPT No:
DA:	PROPERTY FILE:

### Advice:

Use this form for all no permit required, permitted and discretionary planning applications including subdivision as well as for planning scheme amendment & minor amendments to permits.

Completing this form in full will help ensure that all necessary information is provided and avoid any delay. The planning scheme in clause 6.0 provides details of other information that may be required and in each applicable Code.

Often, it is beneficial to provide a separate written submission explaining in general terms what is proposed and why and to justify the proposal against any applicable performance criteria.

If you have any queries with the form or what information is required please contact the office.

### Details of Applicant & Owner

Applicant:	Shane Gould Enterprises P/L

#### Personal Information Protection Statement:

The personal information requested will be managed in accordance with the *Personal Information Protection Act 2004*. The personal information is being collected by Glamorgan Spring Bay Council for the purposes of managing, assessing, advising on and determining the relevant application in accordance with the *Land Use Planning and Approvals Act 1993* (LUPPA) and other related purposes, including for the purpose of data collection.

The information may be shared with contractors and agents of the Council for this purpose, law enforcement agencies, courts and other organisations and it may also be made publicly available on the Council's website and available for any person to inspect in accordance with LUPAA. If you do not provide the information sought, Council will be unable to accept and/or process your application.

#### Declaration:

I/we hereby apply for planning approval to carry out the use or development described in this application and the accompanying documents and declare that: -

- The information in this application is true and correct.
- I/we authorise Council employees or consultants to enter the site in order to assess the application.
- I/we have obtained all copy licences and permission from the copyright owner for the publication, communication and reproduction of the application and reports, plans and materials provided as part of the application and for the purposes of managing, assessing, advising on and determining the application.
- I/we authorise the Council to:
- Make available the application and any and all information, reports, plans and materials provided with or as part of the application in electronic form on the Council's website and in hard copy at the Council's office and other locations for public exhibition if and as required;
- Make such copies of the application and any and all information, reports, plans and materials provided with or as part of the application which are, in the Council's opinion, necessary to facilitate a consideration of the application; and
- Publish and or reproduce the application and any and all information, reports, plans and materials provided with or as part of the application in Council agendas, for representatives, referral agencies and other persons interested in the application.
- You indemnify the Council for any claim or action taken against the Council for breach of copyright in respect of the application and any and all information, report, plan and material provided with or as part of the application.
- I/we authorise Council to provide a copy of any documents relating to this application to any person for the purpose of assessment or public consultation and agree to arrange for the permission of the copyright owner of any part of this application to be obtained.
- I/We declare that the Owner has been notified of the intention to make this application in accordance with section 52(1) of the *Land Use Planning and Approvals Act 1993*.

Applicant Signature:		Date:	21 February 2022
-------------------------	--	-------	------------------

#### If application is on or affects Council or Crown owned or administered land

If land affected by this application is owned or administered by the Crown or Council then the written permission of the relevant Minister (or their delegate) and/or the General Manager must be provided. For Crown land a copy of the instrument of delegation must be provided.

I declare that I have given permission for the making of this application for use and/or development.

Signature of Owner:		Date:	21 February 2022
---------------------	--	-------	------------------

*It is the applicant's responsibility to obtain any consent prior to lodgement. Written requests for Council consent are via the General Manager. Request for Ministerial consent is to be directed to the relevant department.*

### CHECKLIST OF APPLICATION DOCUMENTS Taken from Section 6 of the Planning Scheme

An application must include:

- (a) a signed application form;
- (b) any written permission and declaration of notification required under s.52 of the Act and, if any document is signed by the delegate, a copy of the delegation;
- (c) details of the location of the proposed use or development;
- (d) a copy of the current certificate of title for all land to which the permit sought is to relate, including the title plan; and
- (e) a full description of the proposed use or development.

In addition to the information that is required by clause 6.1.2, a planning authority may, in order to enable it to consider an application, require such further or additional information as the planning authority considers necessary to satisfy it that the proposed use or development will comply with any relevant standards and purpose statements in the zone, codes or a specific area plan, applicable to the use or development including:

- (a) any schedule of easements if listed in the folio of the title and appear on the plan, where applicable;
- (b) a site analysis and site plan at a scale acceptable to the planning authority showing, where applicable:
  - (i) the existing and proposed use(s) on the site;
  - (ii) the boundaries and dimensions of the site;
  - (iii) topography including contours showing AHD levels and major site features;
  - (iv) natural drainage lines, watercourses and wetlands on or adjacent to the site;
  - (v) soil type;
  - (vi) vegetation types and distribution including any known threatened species, and trees and vegetation to be removed;
  - (vii) the location and capacity and connection point of any existing services and proposed services;
  - (viii) the location of easements on the site or connected to the site;
  - (ix) existing pedestrian and vehicle access to the site;
  - (x) the location of existing and proposed buildings on the site;
  - (xi) the location of existing adjoining properties, adjacent buildings and their uses;
  - (xii) any natural hazards that may affect use or development on the site;
  - (xiii) proposed roads, driveways, parking areas and footpaths within the site;
  - (xiv) any proposed open space, common space, or facilities on the site; and
  - (xv) proposed subdivision lot boundaries;
- (c) where it is proposed to erect buildings, a detailed layout plan of the proposed buildings with dimensions at a scale of 1:100 or 1:200 as required by the planning authority showing, where applicable:
  - (i) the internal layout of each building on the site;
  - (ii) the private open space for each dwelling;
  - (iii) external storage spaces;
  - (iv) parking space location and layout;
  - (v) major elevations of every building to be erected

Shane Gould Enterprises P/L Development Application 25<sup>th</sup> January 2022

### **Wildflower Sands accommodation development application January 2022**

*This cover letter is to be read with attached development application drawing set, plus soil, wastewater and bushfire management reports. This application is an amendment to a previously submitted DA 2021/00234 but withdrawn in December 2021*

Wildflower Sands is a proposal by Shane Gould Enterprises P/L for a development for one additional holiday accommodation and one residence, on land located at 50 Harveys Farm Road, Bicheno. Situated in a rural living zone, it has one visitor accommodation on it already, built in 2020.

Once this development application is approved by the Glamorgan Spring Bay Council, the owner will apply for registration of a strata plan, as provided for under the Tasmanian strata titles act, 1998. There is a precedent for strata titled property at 65 Harveys Farm Rd.

The site is on a once-forested 1.66 ha block that was cleared 20 years ago. Over 25 species of wildflowers remain, as well as remnant shrubs and trees along the boundaries. Additional plantings of native species that will mature in the coming years, will create a biodiverse park-like setting for the houses to nestle amongst. The developer is using the model of the award-winning Sandpiper visitor accommodation, which reconstituted native species on cleared land, to create the appearance and feeling of a secluded parkland that make Sandpiper a well-known attraction of the East Coast.

Each of the two proposed structures being applied for, are modernized versions of traditional Tasmanian Beach Shacks. The three-bedroom, two-bathroom residence and the two-bedroom two-bathroom visitor cottage, will complement the existing surrounding blue and green spaces at the coast, while adding value to the larger Bicheno holiday and residential built environment.

The development is uniquely positioned to highlight forested hills, hobby farm and vineyard views, ocean sounds, and the sea air. The design will blend with existing rural lifestyle homes in the neighbourhood, and with the people who live there. The ocean, less than 1 km from the site, can be seen and heard from each of the two proposed building envelopes, approximately 2000msq in size. The low-density development is compatible with the intensity of the conglomeration of rural lifestyle houses, holiday accommodations and sheds in the immediate vicinity, which is only 1.7km from the Bicheno post office and 300metres from Tasman Hwy. Natural environments are known to provide mental and emotional therapeutic benefits, which is one of the attractions to coastal Tasmania. With this concept in mind, the planned landscaping, house designs, and their placement are purposefully composed to enrich the sense of engaging with the natural environment. Traditional Tasmanian shacks are practical buildings, embodying a lifestyle, an excuse to live within the environment.

1

Shane Gould Enterprises P/L Development Application 25<sup>th</sup> January 2022

### **Summary of development details**

The site is serviced with town water and power, but sewerage is not. Each house will have an onsite wastewater dispersal system. Rubbish collection is provided once a week. Once the strata plan is in place, owners will share some infrastructure, including road frontage driveway (existing), boundary fences (existing) and internal permeable, all-weather driveway (partially created). Fire-fighting water tanks and hydrant will also be shared, along with swales and vegetated lining of the driveway. A bush fire management plan has been created and rated either BAL 12.5 or BAL 19. The houses are all less than 152 sqm footprint and single storey. Once strata'd and sold, new owners can rent them out or be used for personal holidays. The size of the accommodation houses limits the maximum number of holiday makers to 4 people per night per house. There will be an onsite or appointed local manager, in addition to the strata management company bylaws and management plan.

As modernized versions of the traditional Tasmanian "Beach Shack, each of the house designs have a forward reaching gesture towards sea or bushland views and take advantage of northern sun angles for passive solar design. These modern "shacks" are designed with a prominence of timber, and display iconic Tasmanian building products, such as weatherboard and corrugated iron. Exterior cladding will consist of a choice of vertical or horizontal fibre cement boards, exterior ply, or milled timber boards. Painted or stained in muted colours of greys, spotted gum, and colourbond roof colours, 'monument', 'windspray' and 'basalt'.

### **Neighbourhood residents**

There is a diversity of residents in the neighbourhood. A blend of permanent residents, part-time residents, visitor accommodations, a commercial swim school, tradesmen's workshops, a commercial abalone farm, sheep hobby farming and machinery storage, a commercial vineyard and cellar door, and a firewood processing operation.

Wombat, wallaby, possum, and echidna, along with nesting wrens, magpie and Tasmanian firetails, in addition to other common birds have been observed. The vegetation on the southern side is part of a linked wildlife corridor with adjacent woodland forest dominated by tall mature eucalyptus species. This open woodland forest also connects to the hills above Bicheno town, extending north into the Douglas-Apsley National Park. To the west and south, forest stands lead into Freycinet National Park. The intention is to enhance biodiversity and wildlife corridors while enabling opportunities for healthy human lifestyles.

More extreme rainfall events are projected on the east coast due to climate change. The planned design of water management for the entire block, is intended to mitigate the stress on council resources and downstream neighbours during heavy rain events. Additionally, reducing evaporation and encouraging a deep topsoil and improved soil biota, which are also features of climate change mitigation strategies and landscape regeneration principles.

Shane Gould Enterprises P/L Development Application 25<sup>th</sup> January 2022

### **Developer details**

The company owner/developer, Shane Gould Enterprises P/L has owned the property since May 2019. The principal of SGE P/L, Dr Shane Gould PhD, along with husband Milton Nelms, have lived in Bicheno for 12 years and have operated a holiday accommodation 'Beachend' during this time. They have travelled extensively, both interstate and internationally, and have compared development and design styles from many countries, helping to shape their vision for Wildflower Sands. From their local business and their own comings and goings, they understand why visitors and holidaymakers want to come to Bicheno and why they want to return.

Dr Gould's Masters of Environmental Management guides an understanding of protecting natural values, and for selecting which experts to use as resources, consultants, or contractors. All consultants are Tasmanian.

Dr Gould has also been the face of East Coast tourism promotions in her capacity as a national sporting icon and both Milt and Shane are 'locals' who also understand the marketing and economics of tourism. Mr. Nelms has hosted elite athletes in Bicheno as they trained for Olympic Games representation. They both believe that visitor groups such as athletes, bird watchers, golfers, walkers and photographers could use paired holiday houses to stay within proximity of each other, such as what the owners of visitor accommodations in Wildflower Sands could provide.

Dr/Mrs. Shane Gould for Shane Gould Enterprises P/L

# Bushfire Hazard Management Report:

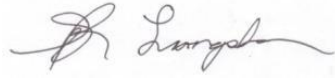

**Report for:** Shane Gould, Milt Nelms,

**Property Location:** 50 Harveys Farm Road, Bicheno

**Prepared by:** Scott Livingston  
Livingston Natural Resource Services  
299 Relbia Road  
Relbia, 7258

**Date:** 7<sup>th</sup> January 2022  
**Version** 2

	<b>Summary</b>
<b>Client:</b>	Shane Gould, Milt Nelms
<b>Property identification:</b>	CT 45761/3 PID 7829508 50 Harveys Farm Road, Bicheno Current Zoning; Rural Living, <i>Glamorgan Spring Bay Interim Planning Scheme 2015</i>
<b>Proposal:</b>	The owner intends to construct 2 new dwellings and an outbuilding.
<b>Assessment comments:</b>	A field inspection of the site was conducted to determine the Bushfire Attack Level and Risk.
<b>Assessment by:</b>	 <hr/> Scott Livingston,  Master Environmental Management, Natural Resource Management Consultant.  Accredited Person under part 4A of the Fire Service Act 1979: Accreditation # BFP-105 Scope 1,2, 3A, 3B, 3C.

## LIMITATIONS

This report only deals with potential bushfire risk and does not consider any other potential statutory or planning requirements. This report classifies type of vegetation at time of inspection and cannot be relied upon for future development or changes in vegetation of assessed area.

## VERSION

This report and BHMP supersede SRL21/45B dated 6th July 2021, with changes to the number of buildings proposed.

## INTRODUCTION

The proponents intend to construct 2 additional dwellings and an outbuilding and associated infrastructure at 50 Harveys Farm Road, Bicheno. The area is mapped as bushfire on planning scheme overlays.

## SITE DESCRIPTION

The property contains one existing dwelling adjacent to Harveys Farm Road. The property apart from managed land around the dwelling and adjacent land to the east, south and west is grassland while land to the north has an access driveway along the boundary and a mosaic of woodland with managed land around dwellings further north. The proposed outbuilding is greater than 6m from a habitable building.

The property is bounded to the east by Harveys Farm Road. The area is serviced by a reticulated water supply, but that supply has no nearby fire hydrants.

See Appendix 1 for photos and Appendix 2 for maps.

## BAL AND RISK ASSESSMENT

The lot is mapped as Bushfire Prone Area in Planning Scheme Overlays.

### VEGETATION AND SLOPE

#### Vegetation & Slope from building facades

		North	East	South	West
Building 2	Vegetation, within 100m of dwelling	0-14m grassland, 14-22m access, 22-100m woodland low threat mosaic	0-85m grassland, 80-100m low threat	0-100m grassland	0-100m grassland
	Slope (degrees, over 100m)	Upslope/flat	Downslope 0-5°	Downslope 0-5°	Upslope/flat
	BAL Rating – current vegetation	BAL FZ	BAL FZ	BAL FZ	BAL FZ
	BAL Rating with HMA	BAL 12.5	BAL 12.5	BAL 12.5	BAL 12.5
Building 3	Vegetation, within 100m of dwelling	0-14m grassland, 14-22m access, 22-100m woodland	0-100m grassland (some low threat)	0-100m grassland	0-100m grassland

	North low threat mosaic	East	South	West
Slope (degrees, over 100m)	Upslope/flat	Downslope 0-5°	Downslope 0-5°	Upslope/flat
BAL Rating – current vegetation	BAL FZ	BAL FZ	BAL FZ	BAL FZ
BAL Rating with HMA	BAL 19	BAL 19	BAL 12.5	BAL 19 part* BAL 12.5

Setback distances for BAL Ratings with HMA have been calculated based on the vegetation that will exist after development and management of land within the property and have also considered slope gradients.

The BAL ratings applied are in accordance with the Australian Standard AS3959 *Construction of Buildings in Bushfire Prone Areas*, and it is a requirement that any habitable building, or building within 6m of a habitable building be constructed to the BAL ratings specified in this document as a minimum.

The Fire Danger Index for Tasmania is **50**

**Table 2: BAL Levels**

Bushfire Attack Level (BAL)	Predicted Bushfire Attack & Exposure Level
BAL-Low	Insufficient risk to warrant specific construction requirements
BAL-12.5	Ember attack, radiant heat below 12.5kW/m <sup>2</sup>
BAL-19	Increasing ember attack and burning debris ignited by windborne embers together with increasing heat flux between 12.5-19kW/m <sup>2</sup>
BAL-29	Increasing ember attack and burning debris ignited by windborne embers together with increasing heat flux between 19-29kW/m <sup>2</sup>

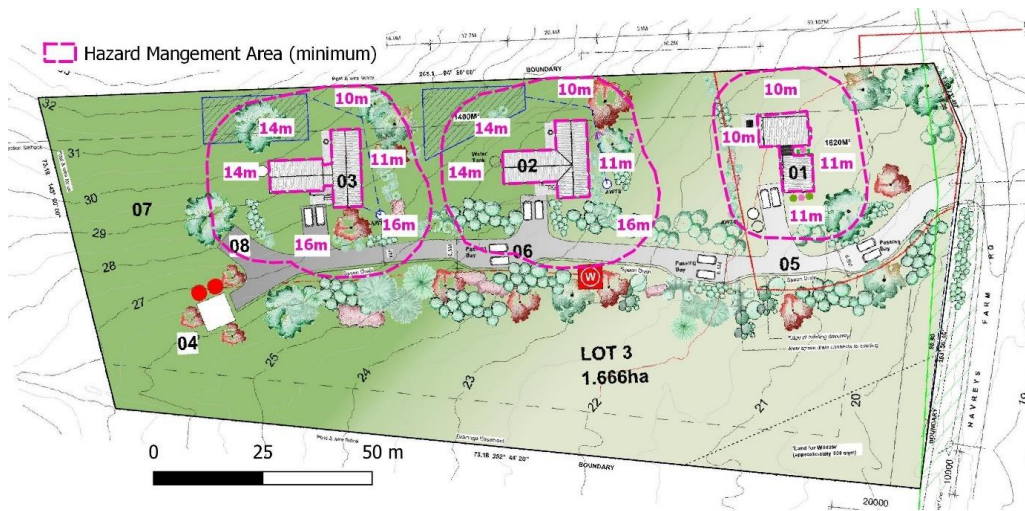

**PROPOSED DWELLING BAL RATING**

**Figure 1: Facade BAL rating**

### **HAZARD MANAGEMENT AREAS**

All land within 10m upslope or level with and 11m downslope of a BAL 19 rated façade and 14m upslope or level with and 16m downslope of a BAL 12.5 rated façade must be managed as low threat vegetation from commencement of construction of a habitable building, this includes areas between building areas if construction is staged. The diagram below includes the HMA for existing building 1 for clarity.

**Figure 2: Hazard Management Area**

### **ACCESS**

Access to habitable buildings and water supply point will be longer than 30m but less than 200m, in total. The initial portion provides access to 3 or more buildings however the 6m wide drive and ample pull off and turn facility and as shown in site plans is considered to be compliant with element B & D in Table 4.2 of the Director of Building Control's *Determination Requirements for Building in Bushfire-Prone Areas*

Table 4.2 Requirements for Property Access

Column 1		Column 2
Element		Requirement
<b>A.</b>	Property access length is less than 30 metres; or access is not required for a fire appliance to access a fire fighting water point.	There are no specified design and construction requirements.
<b>B.</b>	Property access length is 30 metres or greater; or access is for a fire appliance to a fire fighting water point.	<p>The following design and construction requirements apply to property access:</p> <ul style="list-style-type: none"> <li>(a) All-weather construction;</li> <li>(b) Load capacity of at least 20 tonnes, including for bridges and culverts;</li> <li>(c) Minimum carriageway width of 4 metres;</li> <li>(d) Minimum vertical clearance of 4 metres;</li> <li>(e) Minimum horizontal clearance of 0.5 metres from the edge of the carriageway;</li> <li>(f) Cross falls of less than 3° (1:20 or 5%);</li> <li>(g) Dips less than 7° (1:8 or 12.5%) entry and exit angle;</li> <li>(h) Curves with a minimum inner radius of 10 metres;</li> <li>(i) Maximum gradient of 15° (1:3.5 or 28%) for sealed roads, and 10° (1:5.5 or 18%) for unsealed roads; and</li> <li>(j) Terminate with a turning area for fire appliances provided by one of the following: <ul style="list-style-type: none"> <li>i. A turning circle with a minimum outer radius of 10 metres;</li> <li>ii. A property access encircling the building; or</li> <li>iii. A hammerhead “T” or “Y” turning head 4 metres wide and 8 metres long</li> </ul> </li> </ul>

Column 1		Column 2
Element		Requirement
<b>C.</b>	Property access length is 200 metres or greater.	The following design and construction requirements apply to property access: <ul style="list-style-type: none"> <li>(a) The Requirements for B above; and</li> <li>(b) Passing bays of 2 metres additional carriageway width and 20 metres length provided every 200 metres.</li> </ul>
<b>D.</b>	Property access length is greater than 30 metres, and access is provided to 3 or more properties.	The following design and construction requirements apply to property access: <ul style="list-style-type: none"> <li>(a) Complies with Requirements for B above; and</li> <li>(b) Passing bays of 2 metres additional carriageway width and 20 metres length must be provided every 100 metres.</li> </ul>

### **FIREFIGHTING WATER SUPPLY**

---

The lot is serviced by a reticulated supply, with a water main on the eastern side of Harveys Farm Road, however no hydrants are within 120m of the proposed buildings. A static firefighting supply must be installed in compliance with all elements of Table 4.3B of the Director of Building Control's *Determination Requirements for Building in Bushfire-Prone Areas* for each building area.

The requirement will be satisfied by the proposed combined static water supply, which must total 20,000 L, for new buildings and 30,000L if it also replaces existing static supply for Building 1. The supply point may be a remote offtake, provided that offtake is within 3m of hardstand and appropriately plumbed and signed.

Table 4.3B Requirements for Static Water Supply for Fire fighting

Column Element		Column 2 Requirement
<b>A.</b>	Distance between building area to be protected and water supply	<p>The following requirements apply:</p> <ul style="list-style-type: none"> <li>a) The building area to be protected must be located within 90 metres of the water connection point of a static water supply; and</li> <li>b) The distance must be measured as a hose lay, between the water point and the furthest part of the building area.</li> </ul>
<b>B.</b>	Static Water Supplies	<p>A static water supply:</p> <ul style="list-style-type: none"> <li>a) May have a remotely located offtake connected to the static water supply;</li> <li>b) May be a supply for combined use (fire fighting and other uses) but the specified minimum quantity of fire fighting water must be available at all times;</li> <li>c) Must be a minimum of 10,000 litres per building area to be protected. This volume of water must not be used for any other purpose including fire fighting sprinkler or spray systems;</li> <li>d) Must be metal, concrete or lagged by non-combustible materials if above ground; and</li> <li>e) If a tank can be located so it is shielded in all directions in compliance with Section 3.5 of AS 3959-2009, the tank may be constructed of any material provided that the lowest 400 mm of the tank exterior is protected by: <ul style="list-style-type: none"> <li>(i) metal;</li> <li>(ii) non-combustible material; or</li> <li>(iii) fibre-cement a minimum of 6 mm thickness.</li> </ul> </li> </ul>

Column Element		Column 2 Requirement
<b>C.</b>	Fittings, pipework and accessories (including stands and tank supports)	<p>Fittings and pipework associated with a water connection point for a static water supply must:</p> <ul style="list-style-type: none"> <li>(a) Have a minimum nominal internal diameter of 50mm;</li> <li>(b) Be fitted with a valve with a minimum nominal internal diameter of 50mm;</li> <li>(c) Be metal or lagged by non-combustible materials if above ground;</li> <li>(d) Where buried, have a minimum depth of 300mm (compliant with <i>AS/NZS 3500.1-2003 Clause 5.23</i>);</li> <li>(e) Provide a DIN or NEN standard forged Storz 65 mm coupling fitted with a suction washer for connection to fire fighting equipment;</li> <li>(f) Ensure the coupling is accessible and available for connection at all times;</li> <li>(g) Ensure the coupling is fitted with a blank cap and securing chain (minimum 220 mm length);</li> <li>(h) Ensure underground tanks have either an opening at the top of not less than 250 mm diameter or a coupling compliant with this Table; and</li> <li>(i) Where a remote offtake is installed, ensure the offtake is in a position that is: <ul style="list-style-type: none"> <li>(i) Visible;</li> <li>(ii) Accessible to allow connection by fire fighting equipment;</li> <li>(iii) At a working height of 450 – 600mm above ground level; and</li> <li>(iv) Protected from possible damage, including damage by vehicles</li> </ul> </li> </ul>
<b>D.</b>	Signage for static water connections	<p>The water connection point for a static water supply must be identified by a sign permanently fixed to the exterior of the assembly in a visible location. The sign must</p> <ul style="list-style-type: none"> <li>(a) comply with: Water tank signage requirements within <i>AS 2304-2011 Water storage tanks for fire protection systems</i>; or</li> <li>(b) comply with water tank signage requirements within <i>Australian Standard AS 2304-2011 Water storage tanks for fire protection systems</i>; or</li> <li>(c) comply with the Tasmania Fire Service Water Supply Signage Guideline published by the Tasmania Fire Service.</li> </ul>

Column Element		Column 2 Requirement
<b>E.</b>	Hardstand	<p>A hardstand area for fire appliances must be provided:</p> <ul style="list-style-type: none"> <li>(a) No more than three metres from the water connection point, measured as a hose lay (including the minimum water level in dams, swimming pools and the like);</li> <li>(b) No closer than six metres from the building area to be protected;</li> <li>(c) With a minimum width of three metres constructed to the same standard as the carriageway; and</li> <li>(d) Connected to the property access by a carriageway equivalent to the standard of the property access.</li> </ul>

## CONCLUSIONS

---

The proponents intend to construct an additional 2 dwellings and an outbuilding at 50 Harveys farm Road, Bicheno, the area is bushfire prone.

Construction of habitable buildings must be to at least BAL 19 standards for facades within 18m of bushfire prone vegetation off the lot to the north and BAL 12.5 for other facades. The outbuilding is greater than 6m from a habitable building and is not required to meet bushfire standards.

Hazard management areas as shown on the Bushfire Hazard Management Plan will require managed of fuels from commencement of construction of each habitable building as low threat vegetation, managed gardens or lawns maintained to < 100mm in height.

Access must be constructed to the requirements of Table 4.2 of the Director of Building Control's *Determination Requirements for Building in Bushfire-Prone Areas* and be in place prior to commencement of construction.

Static water supply must be installed prior to commencement of construction to meet the requirements of Table 4.3 of the Director of Building Control's *Determination Requirements for Building in Bushfire-Prone Areas*, this may be a combined storage with remote offtake.

Bushfire Hazard Management Plan:

Proposed Development	Construction of 2 dwellings
Site Plan	Danny Leigh McGregor Designs
Property Owner	Shane Gould, Milt Nelms
Address	50 Harveys Farm Road, Bicheno
CT	45761/3
PID	7829508

Construction: BAL 12.5 / BAL 19 as shown

Buildings in Bushfire Prone Area to be built in accordance with the Building Code of Australia and Australian Standard AS3959.

Building setbacks / BAL ratings apply to habitable buildings (Class 1, 2 3, 8 or 9 ) and class 10a buildings within 6m of a habitable building.

Staging of Development

All land within 10m upslope or level with and 11m downslope of a BAL 19 rated façade and 14m upslope or level with and 16m downslope of a BAL 12.5 rated façade must be managed as low threat vegetation from commencement of construction of a habitable building.

Hazard Management Area

Hazard management areas include the area to protect the buildings as well as the access and water supplies.

All land within the area shown as Hazard Management Area must be managed as low threat vegetation from commencement of construction of a habitable building.

This BHMP has been prepared to satisfy the requirements of habitable building. Compliant with Directors Determination Requirements for Building in Bushfire Prone Areas (v2.1) and Director's Determination for Bushfire Hazard Areas v1.1 2021

This plan should be read in conjunction with the report titled: Bushfire Hazard Management Report 50 Harveys Farm Road, Bicheno v2. Livingston Natural Resource Services .

Access

Access to the water supply point m and habitable buildings must be in place prior to commencement of construction.

See report for specifications.

Water Supply

Static Water supply of at least 10,000l per building area must be in place prior to commencement of construction.

See report for specifications,

*Substance of Certificate: (what it is that is being certified)*

1. Assessment of the site Bushfire Attack Level (BAL) to Australian Standards 3959

Assessed as – BAL 12.5 / 19

2. Bushfire Hazard Management Plan

Proposal is compliant with DTS requirements, clauses 4.1, 4.2, 4.3 & 4.4 Directors Determination Requirements for Building in Bushfire Prone Areas (v2.1)

And

Proposal is compliant with DTS requirements, tables 1, 2, 3A/3B & 4, Director's Determination for Bushfire Hazard Areas v1.1 2021.

*Scope and/or Limitations*

**Scope:**

This report was commissioned to identify the Bushfire Attack Level for the existing property. All comment, advice and fire suppression measures are in relation to compliance with Planning Directive No 5.1, Bushfire-Prone Areas Code issued by the Tasmanian Planning Commission, the Building Code of Australia and Australian Standards, AS 3959-2018, Construction of buildings in bushfire-prone areas.

**Limitations:**

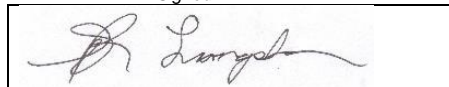

The inspection has been undertaken and report provided on the understanding that;-

1. The report only deals with the potential bushfire risk all other statutory assessments are outside the scope of this report.
2. The report only identifies the size, volume and status of vegetation at the time the site inspection was undertaken and cannot be relied upon for any future development.
3. Impacts of future development and vegetation growth have not been considered.
4. No assurance is given or inferred for the health safety or amenity of the general public or occupants in the event of a bushfire.
5. No warranty is offered or inferred for any buildings constructed on the property in the event of a bushfire.

**I certify the matters described in this certificate.**

## 1. Introduction

Flüssig Engineers has been engaged to undertake a site-specific Stormwater Management Plan (SWMP) for the new visitor accommodation development at number 50 Harveys Farm Road, Bicheno including, but not limited to, lot drainage analysis including stormwater drainage and MUSIC Modelling to stated stormwater quality standards. The purpose of this report is to determine the hydraulic characteristics and stormwater infrastructure capacity of a 5% AEP storm event and treatment on the existing and post-development scenarios.

### 1.1 Scope

This engagement includes:

1. Pre-construction drainage capacity at 5% AEP of existing design.
2. Pre-construction overland flow behaviour of existing stormwater design.
3. Post-construction drainage capacity at 5% AEP of new design.
4. Post-construction overland flow behaviour of new stormwater design.

## 2. Site Characteristics

### 2.1 Site Location

50 Harveys Farm Road is located within Bicheno, Tasmania in the municipality of the **Glamorgan Spring Bay Council**. The site is approximately 16,660 m<sup>2</sup> lot with a proposed 2 new visitors accommodation buildings and the existing dwelling to remain inside the lot development.

The development site is surrounded by rural living zoning area.

Figure 1. 50 Harveys Farm Road, Bicheno Development Location

### 2.2 Topography

50 Harveys Farm Road is approximately 1.66 ha area draining from approximately 28m AHD to 20m AHD to an existing stormwater culvert in the east boundary. The land use is predominantly rural living zone area. As can be seen by the topography in Figure 2, the area slopes southeast towards Harvey Farm Road.

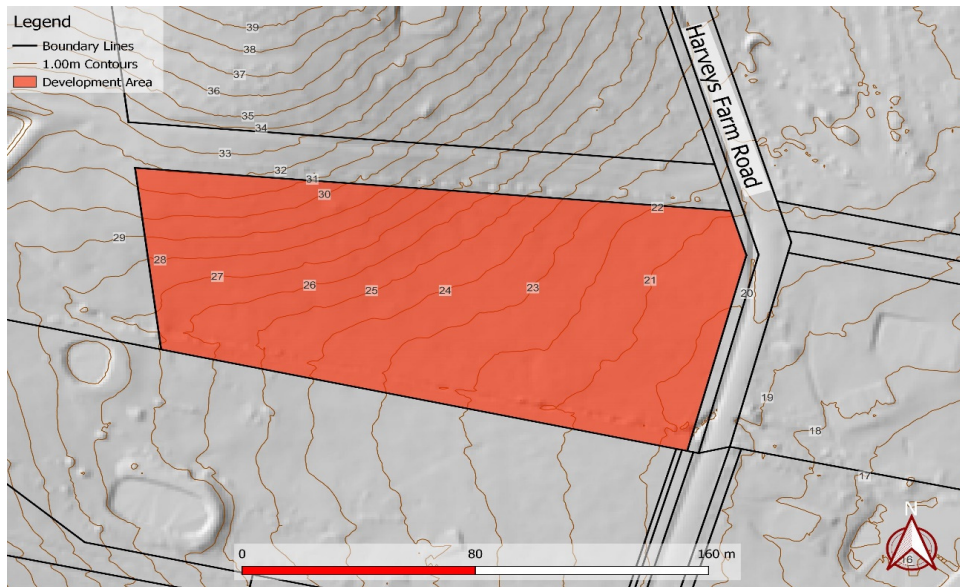

Figure 2. Catchment Boundary (approximate boundary only)

### 3. Proposal

#### 3.1 Proposed Development

The proposed development consists of 3 new visitor accommodation buildings including a driveway access road. Connection to Harveys Farm Road is to be at the existing lot access. Design of the development was not undertaken as part of the engagement by Flüssig Engineers. Figure 3 shows the road and services plan proposed by others.

Figure 3. Planning Subdivision Design

## 4. Data

### 4.1 Survey Data

All survey data was supplied by the client as a processed AutoCAD. The provided data has been incorporated into various software to undertake the analysis.

## 5. Stormwater Quantity

### 5.1 Catchment Analysis

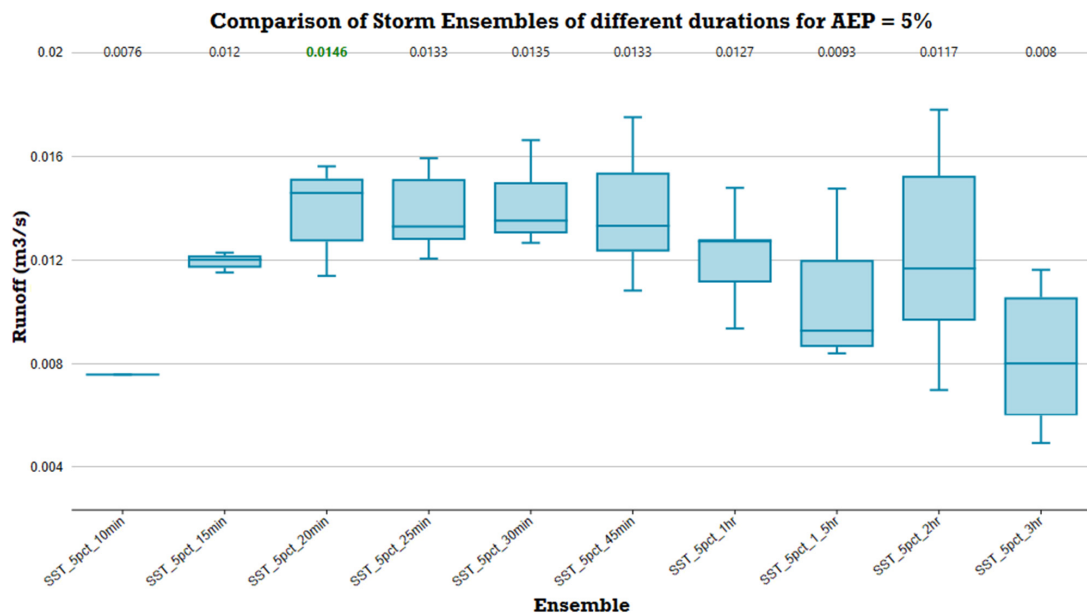

The catchment was modelled using Rafts Hydrology software within Infoworks ICM. RAFTS software uses the Laurenson runoff-routing method to calculate runoff using the catchment properties including size, slope and % impervious. This method is accepted within ARR2019 for areas larger than single dwelling lot.

### 5.2 Catchment Conditions

The development site lies within a catchment area that extends from Harveys Farm Road to the top of the adjacent hill with an overall catchment area of 30.00ha approximately. The soil onsite is predominately weathered dolerite <500mm deep overlain on dolerite bedrock. This allows for drainage directly to a stream or piped infrastructure.

#### 5.2.1 Design Intensity Storms

Design storm durations and temporal pattern were calculated using Australian Rainfall and Runoff 2019 (ARR19) guidelines, running ten temporal pattern events through each duration to determine the worst-case duration using the median temporal pattern. Figure 4 below shows the 5% AEP rainfall event as the 1-hour storm event.

**Figure 4. 5% Temporal Storms Box and Whisker Plot**

### 5.2.2 Land use

Land use for the development both pre- and post-development were derived from plans and aerial imagery. Land use values are as follows in Table 1.

**Table 1. Land Use Area**

Land Use	Pre-Development		Post-Development	
	Area (ha)	% Total land	Area (ha)	% Total land
<b>Total Impervious</b>	0.05	3	0.19	11
<b>Total Pervious</b>	1.61	97	1.47	89

As this is a visitor accommodation development, new building and driveways areas were based on the architectural drawings.

### 5.2.3 Manning's n and losses

Losses for this catchment were derived from ARR19 data hub. As per ARR19, losses were taken at 60% of prescribed value to account for effective impervious area. See Table 2 for loss values. Manning's n values were taken directly from best practice manuals as shown in Table 3.

**Table 2. Runoff Coefficients**

Surface	Initial losses (IL) mm	Continuing Losses (CL) mm/ hr
<b>Pervious</b>	12	1.8
<b>Impervious</b>	1	0

**Table 3. Manning's N coefficients**

Land Use	Manning's n
Swale Channel	0.025
Road	0.018
Gravel	0.025
Urban Yards	0.045
Buildings	0.3

### 5.3 Development Runoff

Stormwater runoff from the development site has been assessed under pre- and post-development models to determine the potential impact the development at 50 Harveys Farm Road has on the immediate local flows. As per planning guidelines it is a requirement that this does not worsen from pre to post development.

Using the above parameters, the site was calculated using Infoworks ICM software and ARR19 best practice manuals. Site characteristics for the pre- and post-development model are summarised in Table 4.

**Table 4. Site Characteristics**

Catchment	Area (ha)	Maximum Slope (%)	Total Land use pervious/ impervious (ha)	Storm duration and pattern
<b>Pre-Development</b>	30.0	17	1.6/ 0.05	5% 20-minute storm pattern 6
<b>Post-Development</b>	30.0	17	1.47/ 0.19	5% 20-minute storm pattern 6

### 5.4 Model Results

The pre- and post-development scenarios were calculated using Infoworks ICM software against the 5% and 1% AEP storm events. The storm durations were derived from the worst case median temporal pattern for these two events which were both 20 minutes duration.

The pre and post conditions can be seen in Figure 5 below showing the peak discharge and increase in peak discharge from pre to post development.

As per the Glamorgan Spring Bay Interim Planning Scheme 2015, E7.0 (Stormwater Management) the post-development allowable site discharge must not exceed the pre-development site discharge. As can be seen from Table 5, this is exceeded in the 5% AEP by a peak discharge of 0.053m<sup>3</sup>/s, more than the allowable site discharge of 0.0196m<sup>3</sup>/s. Therefore, the site must detain the difference using an onsite stormwater detention (OSD) system.

**Figure 5. Site Discharge Curves Pre vs Post-Development**

The required storage is the difference between the pre- and post-development curves shown in Figure 5 above. This area between the curve equates to a storage requirement which can be seen in Table 5.

**Table 5. Discharge volume rates pre- and post-development scenarios**

Design Event (AEP)	Discharge Volume (m <sup>3</sup> )			
	Pre-Development	Post-Development	Permissible Site Discharge	Required Subdivision Detention
5%	0.019	0.053	0.0196	13.5

## 5.5 On-Site Detention Sizing and Configuration

As shown in Table 5, the site discharge increase due to development needs to be detained or otherwise agreed. The sections below outline the requirements for house and road storage.

### 5.5.1 Subdivision Detention

Stormwater from the development including road surface is serviced by open drain, 300mm lot drainage and several stormwater drainage pits. Stormwater drainage runs to proposed detention tanks and to a new absorption trench located within the proposed area. As can be seen from Table 5 after allowance has been made to detain each future dwellings the total volume discharged in the storm event still exceeds pre-development flows. Therefore, when looking at Table 5 the development would still require detaining 224m<sup>3</sup>. Refer to "APPENDIX A Calculations"

Due to site topography, would be practical to install detention of this size within the road reserve.

## 5.6 Maintenance

Soakage trench maintenance plan is required to be complete once a year.

- Visually inspect for sediment and debris accumulation within the trench areas annually.
- Clean trench if sediment/debris accumulates taking up 20% of the storage capacity.
- Detailed inspection of sediment accumulation (sediment survey) every 5-7 years. Inspect drainage area for erosion and possible illicit discharges.
- Repair clogging or erosion at the inlets, outlets, and overflow.
- Perform any mowing or weed control needed.
- Identify erosion and repair as needed.

## 5.7 1% AEP Overland Flow Path (OFP)

As per Glamorgan Spring Bay Council requirements, runoff for the 1% AEP is not required to be captured by infrastructure nor detained onsite in an OSD. However, the 1% AEP storm must be able to drain through the site and not cause additional impedance on the neighbours or future residents.

Figure 6 below shows the pre-development overland flow path for the site in the event of a 1% AEP storm.

Figure 6. 1% AEP OFP Pre-Development

Figure 7. The existing overland flow path shown outside of the proposed development areas and into Harvey's Farm Road.

**Figure 7. 1% AEP OFP Post-Development**

## 5.8 Quantity Summary

The SMP quantity report has been designed from the GSBC IPS2015 and best practice design and guidelines. The following is a summary of the requirements for stormwater management for the development at 50 Harveys Farm Road, Bicheno:

1. Each developed lot is required to detain runoff from impervious areas to pre-development discharge.
2. Storage requirements from the development runoff would require a volume of 13.5kl detention system to be situated within the road lot area.
3. The 1% AEP runoff overland flow paths can be directed from development site via open channel.

## 6. Water Quality

Water quality modelling for the site has been undertaken with the urban stormwater improvement conceptualisation software MUSIC. The modelling conducted in MUSIC has been done in accordance with MUSIC Modelling Guidelines and the Tasmanian State Stormwater Strategy. This document provides a guide to water quality modelling methodology and outlines the assumptions that should be made when selecting input parameters.

Recommendation for the improvement of the water quality on site would include the diversion of stormwater flows from the subdivision to primary treatment system (treatment train). This would reduce the pollutants in the receiving waters further and be a safe design option if future usage of this sub catchment provides higher pollutant storm water runoff.

## 6.1 Stormwater Quality Treatment (construction phase)

During construction, many pollutants are generated from various sources. These pollutants can easily be captured in stormwater runoff and introduced into the downstream receiving environment polluting the waterways. Listed below are some of the main construction phase pollutants:

- Litter from construction – material packaging, paper, plastic, food packaging, off cuts etc.
- Sediment erosion and transports from excavated material and fresh surfaces.
- Hydrocarbons – equipment and machinery
- Toxic material – cement, solvents, paints, cleaning agents etc.
- pH altering substances – cement, cleaning agents etc

Construction phase pollutants should be planned and mitigated for by a designed site-specific SWMP as part of the drawing set. This should detail controls including but not limited to:

- Diversion of upslope water (where applicable)
- Stabilised exit/ entry points
- Minimise site disturbance where possible
- Implement sediment control along downslope boundaries
- Appropriate location and protection for stockpiles
- Capture on-site runoff that may contain pollutants
- Maintain control measures
- Stabilise site after disturbance (revegetate etc)

## 6.2 Stormwater Quality Modelling

Stormwater pollutant modelling for the 50 Harveys Farm Road development was undertaken using Model for Urban Stormwater Improvement Conceptualisation (MUSIC) software, version 6.3.0, under the guidelines of the State Stormwater Strategy and Interim Planning Scheme

This model splits the catchment into the following typical areas:

- Residential Catchment
- Road Catchment (including bank runoff)

The following fraction impervious and land areas having been adopted in the modelling as per the concept design measurements. See Table 6 below for fraction imperviousness (fi).

**Table 6. Adopted Fraction Impervious**

Catchment Area (ha)	Roof		Road		Driveway		Backyard	
	Area (ha)	fi	Area (ha)	fi	Area (ha)	fi	Area (ha)	fi
<b>1.66</b>	0.065	1	0	0.80	0.122	0.9	1.47	0

### 6.2.1 Council Planning Quality Removal Standards

The Clarence Interim Planning Scheme 2015 has adopted the pollutant removal targets and best practice from the State Stormwater Strategy 2010. See Table 7 for target removal rates.

**Table 7. State Stormwater Strategy Pollutant Removal Targets**

Parameter (kg/year)	Result Pollutant Retention on Developed Site
<b>Total Suspended Solids (TSS)</b>	80%
<b>Total Phosphorous (TP)</b>	45%
<b>Total Nitrogen (TN)</b>	45%
<b>Gross Pollutants</b>	90%

### 6.3 Treatment Train

To achieve stormwater pollutant removal targets outlined above and considering site constraints. This model utilised grassed swales, rainwater tanks and soakage trench (Figure 8). The treatment train consists of gravel access and houses draining through stormwater infrastructure to a soakage trench.

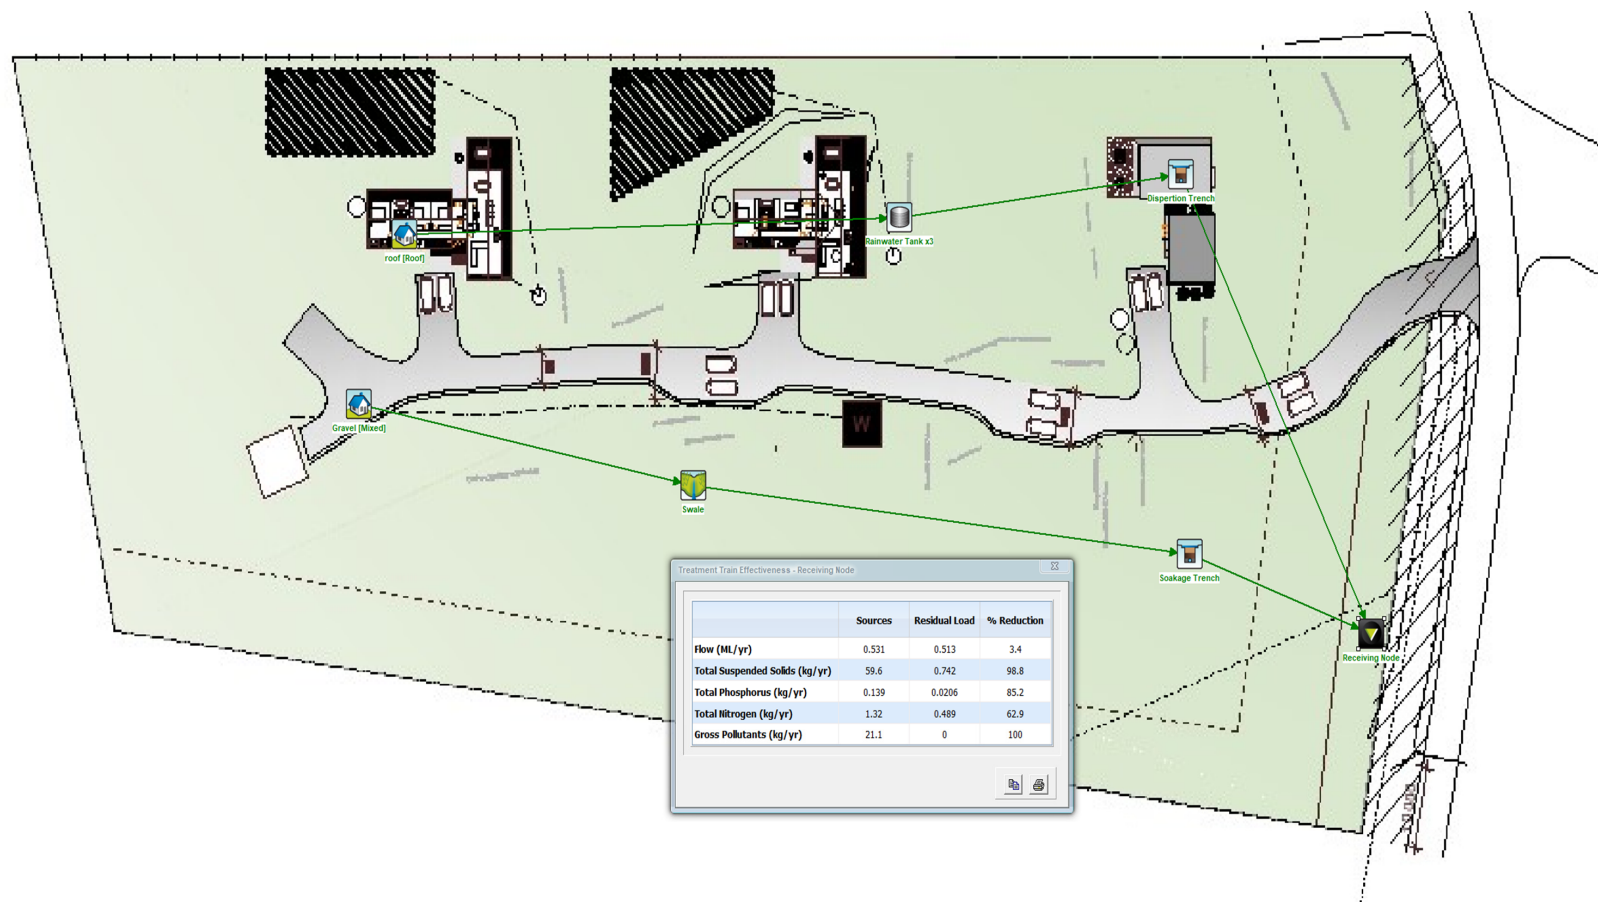

Figure 8. MUSIC Treatment Train Effectiveness Result

## 6.4 Quality Results

The MUSIC pollutant load reductions are detailed in Table 8 below. As can be seen when comparing the MUSIC results to the required state stormwater strategy target load reductions, the specified treatment train outlined above and as seen in Figure 8 show that all targets either meet or exceed state reduction targets.

**Table 8. Pollutant Removal Achieved vs Targets**

Parameter (kg/year)	Target Load Reduction (%)	MUSIC Modelled Load Reduction (%)	State Stormwater Targets Achieved (Y/N)
<b>Total Suspended Solids (TSS)</b>	80.0	98.8	Y
<b>Total Phosphorous (TP)</b>	45.0	85.2	Y
<b>Total Nitrogen (TN)</b>	45.0	62.9	Y
<b>Total Pollutants</b>	90.0	100	Y

Based on the water quality assessment using the MUSIC software, it is found that the pollutant reduction improvement can be achieved by adopting the Stormwater Quality Improvement Devices (SQIDs) specified in **Error! Reference source not found..**

## 6.5 Maintenance

To ensure ongoing operation of all treatment systems, the developer would be required to perform regular maintenance on all treatment devices to ensure they remain in good working order. This would include, but not be limited to, the information described in Table 9.

**Table 9. Concept Maintenance Plan**

Task	Action	Frequency
<b>General Cleaning</b>	Clear all pollutants from storage and device filters, ensure operational	Approximately every 6 months
<b>Specialised cleaning and inspection</b>	Inspect all storage, inflow and outflow – clean and flush if required. Visually inspect main device for defects	Yearly
<b>Maintenance</b>	Perform detailed inspection and maintenance of trench and associated infrastructure by a qualified person.	Every 5 years.

The above maintenance plan is generic and based on removal rates and best practice advice.

## 6.6 Quality Summary

Flüssig Engineers recommends the following be undertaken to ensure the ongoing stormwater quality from the developed site:

1. Construction quality control should be implemented to prevent pollution during construction.
2. Installation of treatment devices in the order specified in this document (Figure 8), not including individual lot devices.
3. Maintenance plans need to be created and adhered to ensure the ongoing operation of the systems.
4. Flüssig Engineers notes that some of the specified treatment products are proprietary products and although suitable in this instance, does not limit the developer to this product. However, any product selected by the developer should meet removal properties of these products for the MUSIC model to be valid.
5. Flüssig Spatial notes that the installation of soakage trench or swales may not be feasible due to site restrictions. Should this be the case Flüssig Engineers recommends a contribution to Council for improvements to public stormwater treatment systems downstream be made in lieu of the installation of soakage trench and swales.

## 7. Conclusion

The post-development quantity and quality scenarios for the Stormwater Management Plan for 50 Harveys Farm Road, Bicheno have been investigated. Post-development quantity and quality have been assessed against both the Glamorgan Bay Interim Planning Scheme 2015, Planning Conditions, and the State Stormwater Strategy to ensure the post-development flows meet specified standards.

The following conclusions were derived in this report:

1. A comparison of the post-development peak flows for the 5% AEP storm event were undertaken against the pre-development flows and found to increase site discharge.
2. Storage detention basin is required for the subdivision.
3. The 1% OFP was assessed through the site and shown that it can directed away from neighbouring properties and critical infrastructure on site.
4. Treatment system designed and sized using MUSIC can achieve required pollutant removal through the installation of treatment device.

Under the Stormwater Management Plan, the development site will meet current specified standards for both quantity and quality control.

## 8. Limitations

Flüssig Engineers were engaged by the developer of 50 Harveys Farm Road, Bicheno for the purpose of a site-specific stormwater management plan as per E7.0 of the Glamorgan Spring Bay Planning Scheme 2015. This study is deemed suitable for purpose at the time of undertaking the study. If conditions of the development change, the plan will need to be reviewed against all changes.

This report is to be used in full and may not be used in part to support any other objective other than what has been outlined within, unless specific written approval to do otherwise is granted by Flüssig Engineers.

Flüssig Engineers accepts no responsibility for the accuracy of third-party documents supplied for the purpose of this stormwater management plan.

## INTRODUCTION

This report details the stormwater management strategies for the proposed **50 Harveys Farm Road, Bicheno**. The objective of the report is to demonstrate how stormwater runoff would be captured and conveyed from the subject site safely to the receiving drainage network while considering stormwater quality management and the incorporation of soakage trench system elements.

The owner is proposing to install new detention tanks and a dispersion trench to provide the function of detention and dispersion of the outflow runoff from the new roof areas and overflow from the proposed water tanks. A soakage trench is proposed for the detention and dispersion of the outflow runoff from the new gravel driveway areas.

## EXISTING CONDITIONS AND ASSUMPTIONS

The site covers an area of approximately 16,644m<sup>2</sup>, 654m<sup>2</sup> roofed, 1,219m<sup>2</sup> gravel driveway areas accounting for an impervious area of approximately 1,873m<sup>2</sup>. The site in its current state discharges to existing ground conditions.

The proposed development would result in an increase of impervious area of approximately 11.3%.

Stormwater from the site would be routed through the proposed conventional underground drainage system comprising of Grated Sumps and PVC Pipes, coupled with the use of water tanks elements system and soakage trench for on-site detention.

The stormwater management report is prepared in accordance with the design criteria listed below:

- The stormwater drainage system is designed using Bureau of Meteorology (BOM) published rainfall Intensity Frequency Duration (IFD) data as a minor / major system to accommodate the 5% AEP / 20 min storm events.
- The flow rate of stormwater leaving the site shall be designed so that it does not exceed the pre-developed flow rate for both the minor and major rain events.
- The total site discharges are modelled as described in *Storm Drainage Design in Small Urban Catchments*, a handbook for Australian practice by *Australian Rainfall and Runoff (ARR2019)*, Book 9 – Runoff in Urban Areas.

Existing site conditions are to remain except the new roof impervious areas are to discharge to the water tanks and then outflow into the proposed 20m<sup>2</sup> dispersion trench. The new ground impervious areas are to discharge through a dish drain and into the proposed 150m<sup>2</sup> soakage trench. The stormwater solution is to be implemented for operational purposes and improvement.

## PERFORMANCE SOLUTION COMPLIANCE

AS 3500.3 – CL 7.10	7.10.1 – Overflow is safe and does not compromise freeboard to habitable spaces.
ARR2019 Book 9	7.10.3 – Tank to be of approved zinc coated steel or poly tank. On-Site Detention
General	<ul style="list-style-type: none"> <li>• AS/NZS 3500.3: Part 3 Stormwater Drainage</li> <li>• Australian Rainfall and Run-off Volume 8: Urban Stormwater Management</li> <li>• Australian Runoff Quality – A Guide to Water Sensitive Urban Design</li> <li>• Storm drainage design in small urban catchments: A handbook for Australian practice</li> <li>• Water Sensitive Urban Design (WSUD) Engineering Procedure: Stormwater</li> <li>• Water Services Association of Australia Code (WSAA).</li> </ul>

## DETENTION DESIGN

Detention calculations are provided in Appendix B with the following summary for design:

Section	Area(m <sup>2</sup> )	PSD(L/s)	Detention volume(L)	Type
Impervious roof	654	6.07	6,000	3 X 2,000L rainwater tanks and 20m <sup>2</sup> dispersion trench
Impervious ground(Gravel)	1219	11.49	8,000	Dish drain along length of gravel road and 150m <sup>2</sup> soakage trench
<b>Total</b>	<b>1873</b>			

Detention Volume = 6,000 L (Roofed Areas)

Detention Volume = 8,000 L (Ground Areas)

Stored Volume = 0L

Pre-Development New Impervious Areas Only			Post-Development New Impervious Areas Only	
Land Use	Area m <sup>2</sup>	% Total land	Area m <sup>2</sup>	% Total land
<b>Total Pervious</b>	1,359	73	0	0
<b>Total Impervious</b>	514	27	1,873	100

As per Council's Interim Planning Scheme 2015, E7.0 (Stormwater Management) the post-development allowable site discharge must not exceed the pre-development site discharge. As can be seen from Table above, this is exceeded in the 5% AEP 20min storm duration by a Permissible Site discharge as shown above. Therefore, the site must detain the difference using an onsite stormwater detention (OSD) system with 3 detention tanks with 2,000 Litres minimum capacity each and a soakage trench with 8,000L minimum capacity.

Task	Action	Frequency
<b>General Cleaning – gutters, downpipe, filters etc.</b>	Clear all debris from gutters and tank filters, ensure operational	Approximately every 3 months
<b>Specialised cleaning and inspection</b>	Inspect all gutters downpipes, inflow and outflow – flush if required. Inspect all filters replace if required. Inspect main tank for defects	Yearly
<b>Maintenance</b>	Perform detailed inspection and maintenance of tank and associated infrastructure by a qualified person.	Every 5 years.

#### SUMMARY AND CONCLUSIONS

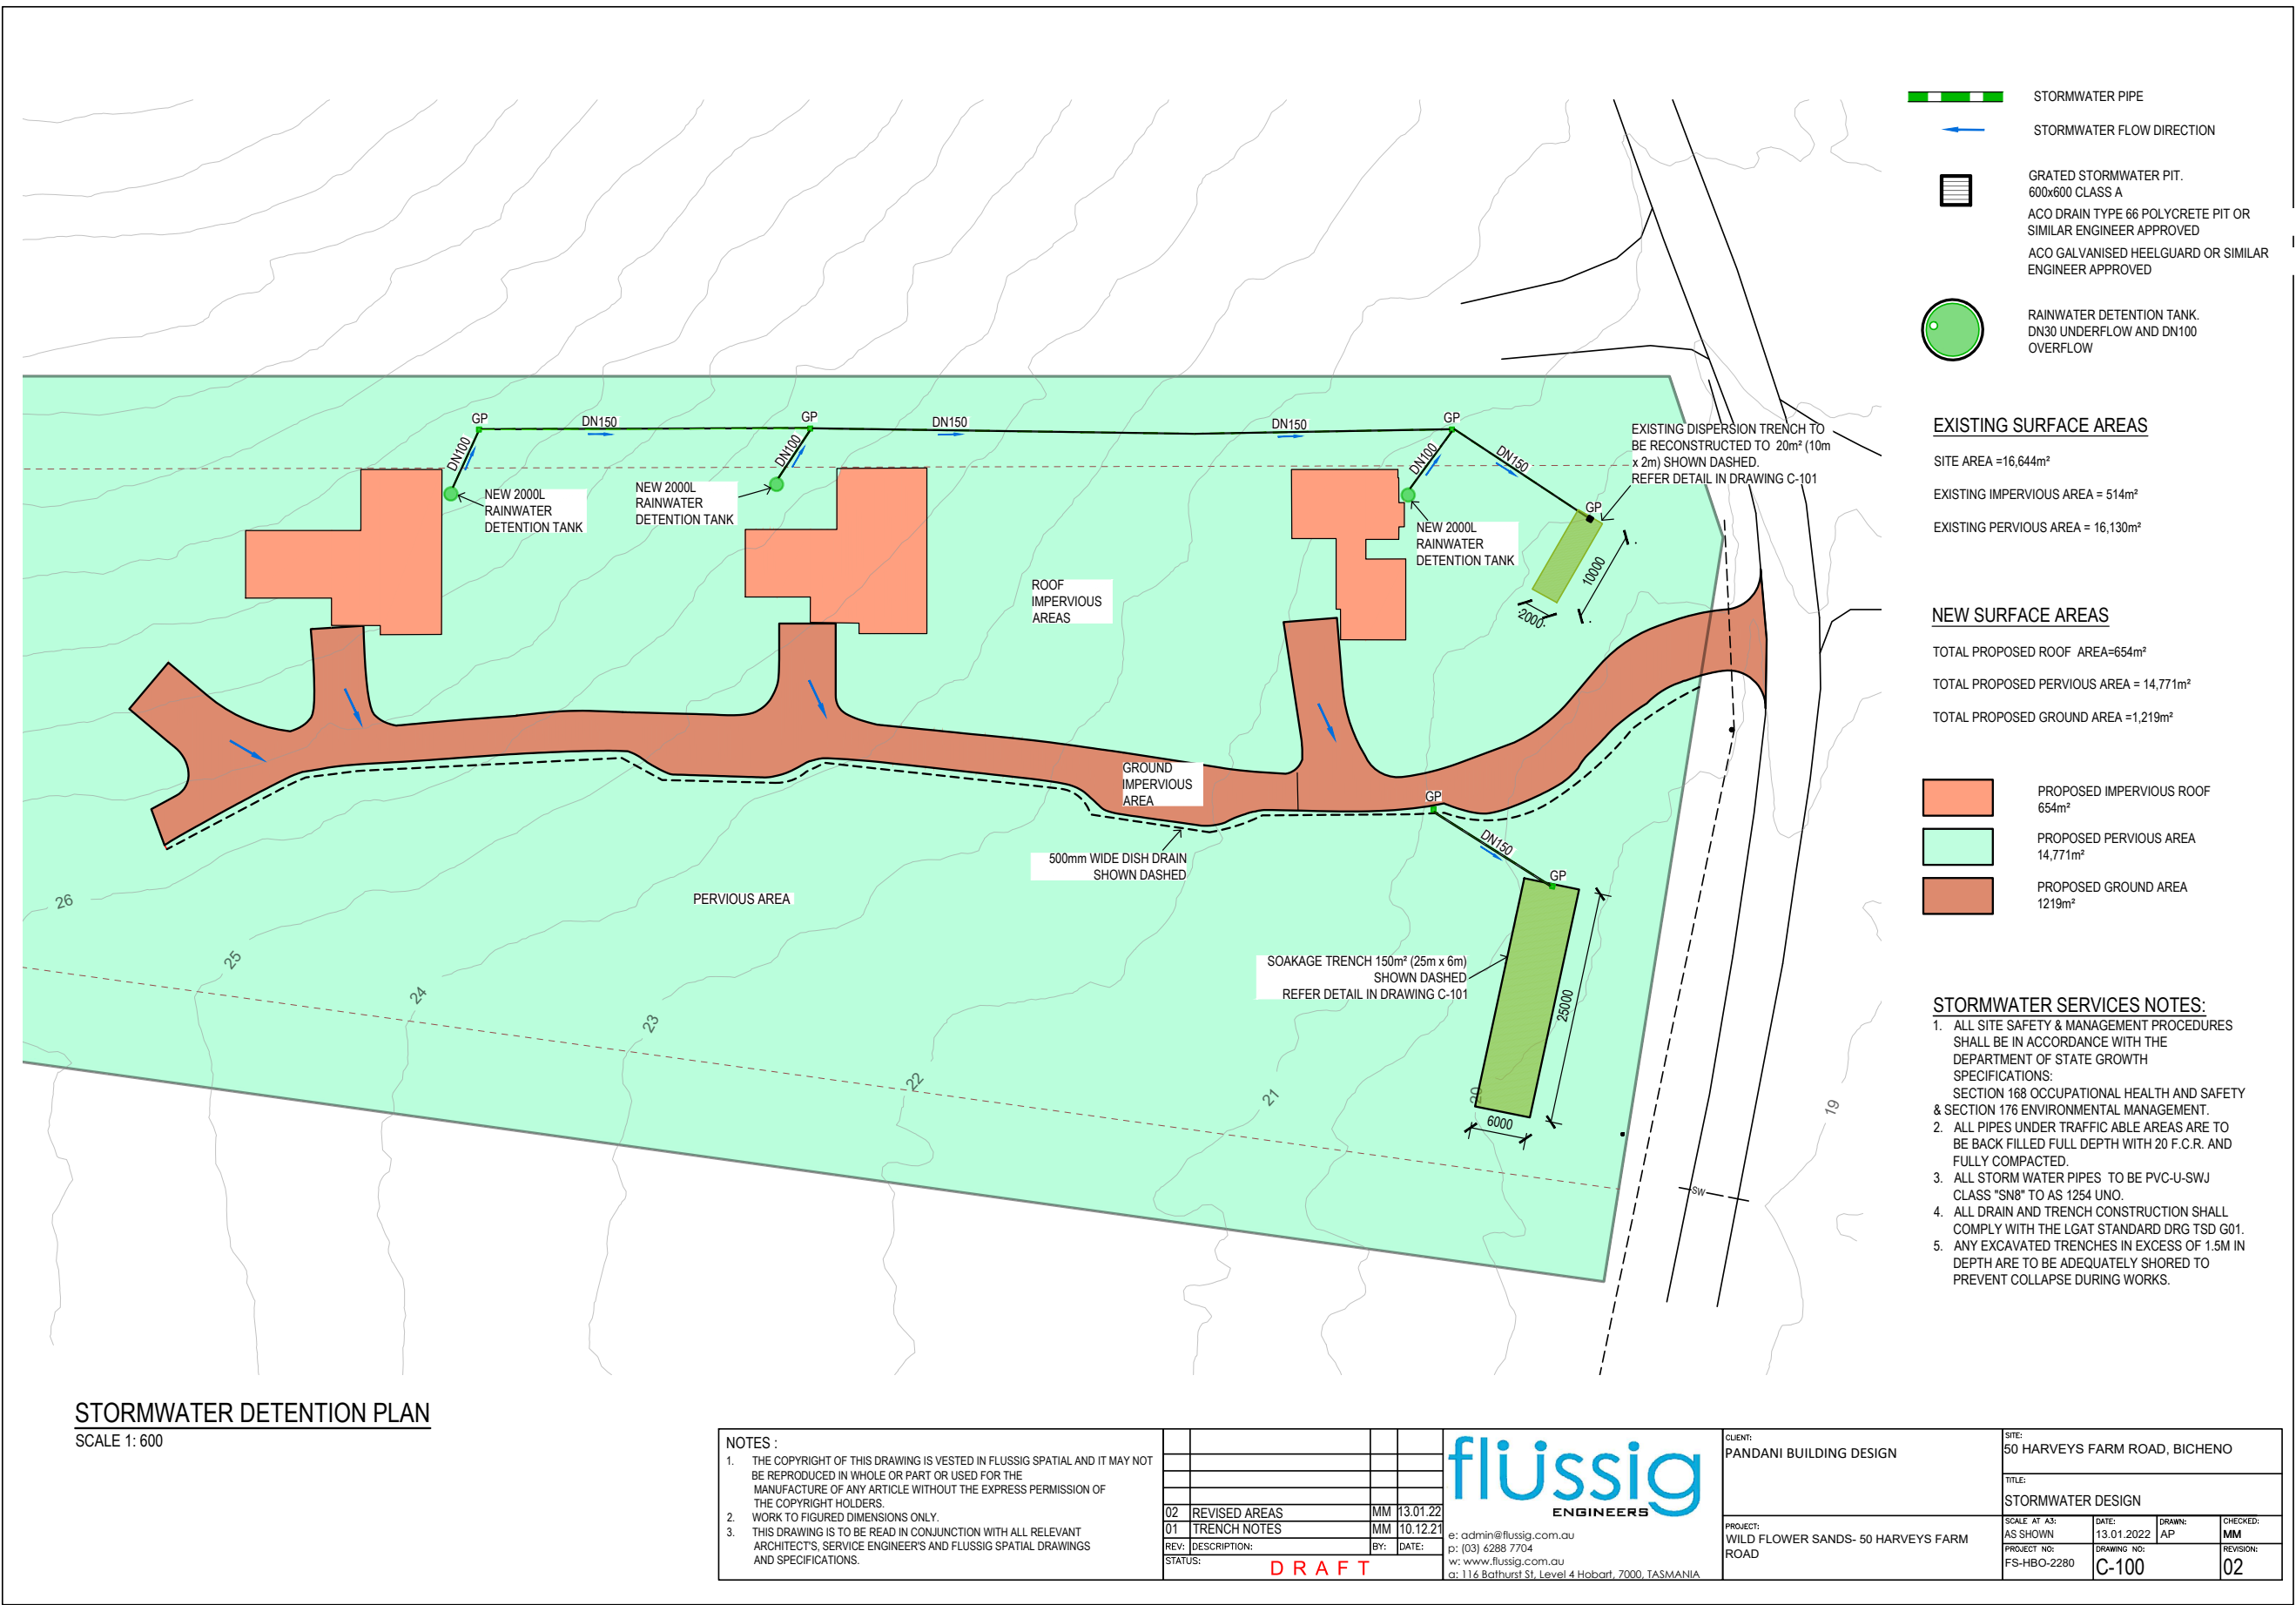

- Detention /Retention tank to be adopted as per design and documentation.
- The designed solution complies with the Performance solution design check carried out above.
- The detention tanks have been sized to detain 6,000 litres over a 20min storm duration.
- The soakage trench has been sized to detain 8,000 litres over a 20min storm duration.

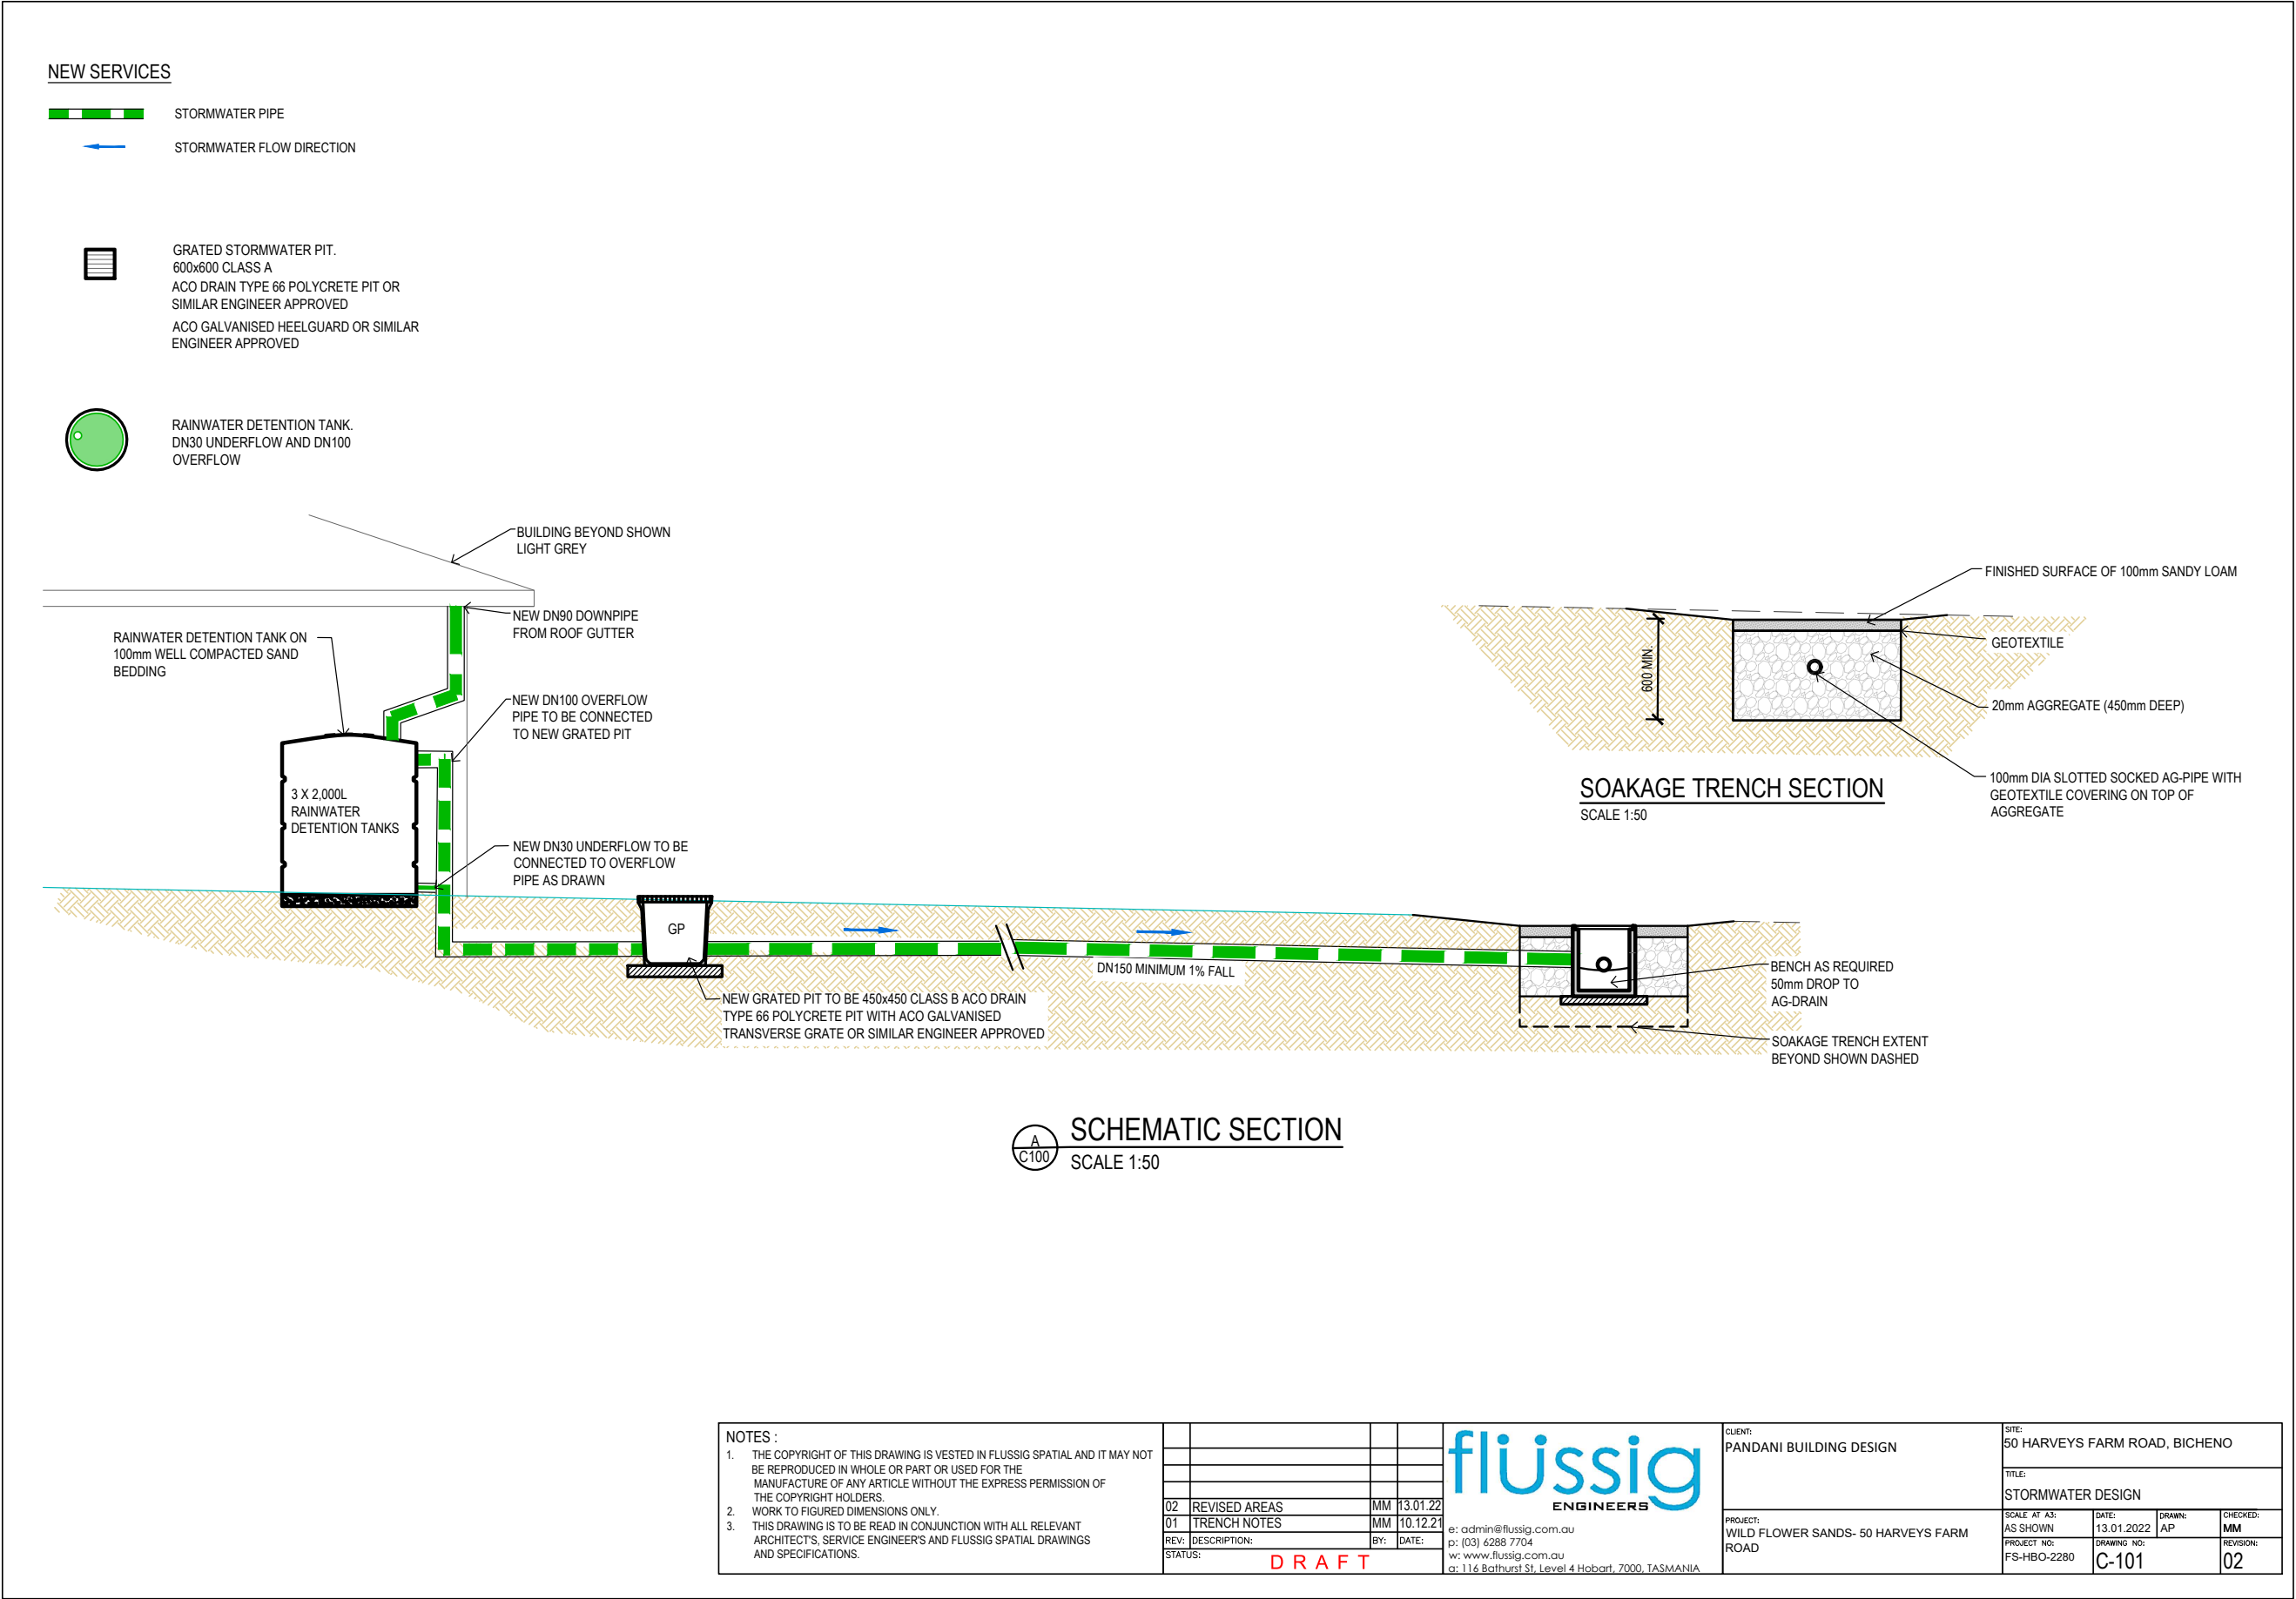

End of Report

## STORMWATER DETENTION V5.04

A | Flussig Engineers

Location: Bicheno, TAS  
Site: 1219m<sup>2</sup> with tc = 20 and tcs = 12 mins.  
PSD: AEP of 5%, Underground rectangular tank PSD = 11.49L/s  
Storage: AEP of 5%, Underground rectangular tank volume = 7.07m<sup>3</sup>

### Design Criteria (Custom AEP IFD data used)

Location = Bicheno, TAS  
Method = E (A)RI 2001,A(E)P 2019

PSD annual exceedance probability (APE) = 5 %  
Storage annual exceedance probability (APE) = 5 %

Storage method = U (A)bove,(P)ipe,(U)nderground,(C)ustom

### Site Geometry

Site area (As) = 1219 m<sup>2</sup> = 0.1219 Ha  
Pre-development coefficient (Cp) = 0.50  
Post development coefficient (Cw) = 0.70  
Total catchment (tc) = 20 minutes  
Upstream catchment to site (tcs) = 12 minutes

### Coefficient Calculations

Pre-development				Post development			
Zone	Area (m <sup>2</sup> )	C	Area * C	Zone	Area (m <sup>2</sup> )	C	Area * C
Concrete	0	0.90	0	Concrete	0	0.90	0
Roof	0	1.00	0	Roof	0	1.00	0
Gravel	357	0.50	179	Gravel	1219	0.50	610
Garden	862	0.30	259	Garden	0	0.30	0
<b>Total</b>	<b>1219</b>	<b>m<sup>2</sup></b>	<b>437</b>	<b>Total</b>	<b>1219</b>	<b>m<sup>2</sup></b>	<b>610</b>
Cp = $\Sigma \text{Area} * C / \text{Total} =$				0.359	Cw = $\Sigma \text{Area} * C / \text{Total} =$		
					0.500		

### Permissible Site Discharge (PSD) (AEP of 5%)

PSD Intensity (I) = 66.5 mm/hr For catchment tc = 20 mins.  
Pre-development (Qp = Cp \* I \* As / 0.36) = 11.27 L/s  
Peak post development (Qa = 2 \* Cw \* I \* As / 0.36) = 31.54 L/s = (0.474 x I) Eq. 2.24  
Storage method = U (A)bove,(P)ipe,(U)nderground,(C)ustom  
Permissible site discharge (Qu = PSD) = 11.488 L/s

#### Above ground - Eq 3.8

$$0 = \text{PSD}^2 - 2 * Q_a / t_c * (0.667 * t_c * Q_p / Q_a + 0.75 * t_c + 0.25 * t_{cs}) * \text{PSD} + 2 * Q_a * Q_p$$

Taking x as = PSD and solving

$$a = 1.0 \quad b = -71.8 \quad c = 710.7$$

$$\text{PSD} = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

$$\text{PSD} = 11.855 \text{ L/s}$$

#### Below ground pipe - Eq 3.3

$$Q_p = \text{PSD} * [1.6 * t_{cs} / (t_c * (1 - 2 * \text{PSD} / (3 * Q_a))) - 0.6 * t_{cs}^{2.67} / (t_c * (1 - 2 * \text{PSD} / (3 * Q_a)))^{2.67}]$$

$$= 11.27$$

$$\text{PSD} = 11.863 \text{ L/s}$$

#### Below ground rectangular tank - Eq 3.4

$$t = t_{cs} / (t_c * (1 - 2 * \text{PSD} / (3 * Q_a))) = 0.792$$

$$Q_p = \text{PSD} * [0.005 - 0.455 * t + 5.228 * t^2 - 1.045 * t^3 - 7.199 * t^4 + 4.519 * t^5]$$

$$= 11.27$$

$$\text{PSD} = 11.488 \text{ L/s}$$

**STORMWATER DETENTION V5.04**

A | Flüssig Engineers

**Design Storage Capacity (AEP of 5%)**

$$\begin{aligned} \text{Above ground (Vs)} &= [0.5 \cdot Q_a \cdot t_d - [(0.875 \cdot \text{PSD} \cdot t_d)(1 - 0.917 \cdot \text{PSD}/Q_a) + (0.427 \cdot t_d \cdot \text{PSD}^2/Q_a)]] \cdot 60/10^3 \text{ m}^3 & \text{Eq 4.23} \\ \text{Below ground pipe (Vs)} &= [(0.5 \cdot Q_a - 0.637 \cdot \text{PSD} + 0.089 \cdot \text{PSD}^2/Q_a) \cdot t_d] \cdot 60/10^3 \text{ m}^3 & \text{Eq 4.8} \\ \text{Below ground rect. tank (Vs)} &= [(0.5 \cdot Q_a - 0.572 \cdot \text{PSD} + 0.048 \cdot \text{PSD}^2/Q_a) \cdot t_d] \cdot 60/10^3 \text{ m}^3 & \text{Eq 4.13} \end{aligned}$$

Performance solution proposals: Onsite stormwater retention	Prepared by: Flussig Engineers	Date: 13.01.22
Test reports:	Prepared by:	Date:

**Standards, codes or guidelines relied on in design process:**

AS1547-2012 On-site domestic wastewater management.

AS3500 (Parts 0-5)-2013 Plumbing and drainage set.

**Any other relevant documentation:**

Stormwater Performance Solution Report

**Attribution as designer:**

I Max W. Moller, am responsible for the design of that part of the work as described in this certificate;

The documentation relating to the design includes sufficient information for the assessment of the work in accordance with the *Building Act 2016* and sufficient detail for the builder or plumber to carry out the work in accordance with the documents and the Act;

This certificate confirms compliance and is evidence of suitability of this design with the requirements of the National Construction Code.

Max W. Moller

13.01.22

Licence No: 650370893

**Assessment of Certifiable Works: (TasWater)**

**Note: single residential dwellings and outbuildings on a lot with an existing sewer connection are not considered to increase demand and are not certifiable.**

**If you cannot check ALL of these boxes, LEAVE THIS SECTION BLANK.**

**TasWater must then be contacted to determine if the proposed works are Certifiable Works.**

**I confirm that the proposed works are not Certifiable Works, in accordance with the Guidelines for TasWater CCW Assessments, by virtue that all of the following are satisfied:**

- ☒ The works will not increase the demand for water supplied by TasWater
- ☒ The works will not increase or decrease the amount of sewage or toxins that is to be removed by, or discharged into, TasWater's sewerage infrastructure
- ☒ The works will not require a new connection, or a modification to an existing connection, to be made to TasWater's infrastructure
- ☒ The works will not damage or interfere with TasWater's works
- ☒ The works will not adversely affect TasWater's operations
- ☒ The work are not within 2m of TasWater's infrastructure and are outside any TasWater easement
- ☒ I have checked the LISTMap to confirm the location of TasWater infrastructure
- ☐ If the property is connected to TasWater's water system, a water meter is in place, or has been applied for to TasWater.

**Certification:**

I ..... Max W. Representations prepared  
for GSB Council Meeting

27 April 2022

received for

**DA2022/33**

50 Harveys Farm Road Bicheno

### Representation 1

The General Manager.

Dear Mr Ingham,

thanks for your letter notifying us of the renewed proposed development at 50 HFR, [REDACTED]. Although there is one less visitor accommodation planned to be honest it doesn't appear to be much different from the last proposal that was withdrawn. We think the developers should have to be straight up and declare just how many dwellings in total they are planning on building on the block as there is room for another 3 or 4 on the southern side of the driveway. If that's the case then all these engineering reports on stormwater management will be useless as they are modelled on these 3 dwellings. We had gravel filled soakage trenches on our last house and they are about as useless as a wooden frying pan, one decent heavy downpour and water starts bubbling up through the ground. The spoon drain running down beside the driveway would feed into the council drain that flows into the south-western corner of our block and then flows on to our adjoining neighbours and often causes flooding for us. If this proposal is permitted then the GSBC should be responsible for mitigating the runoff through our properties.

Harveys Farm Rd is not suited to this type of development as it is Rural Residential, a narrow potholed road and where this development is planned is on a dangerous bend with limited vision in either direction. Holiday cabins bring increased traffic with boat trailers and vans adding to the problem. The Sandpiper Cottages this is modelled on is on the main Tasman Highway and so is their own Beachend accommodation, Diamond Island Resort has already set a precedent there so why don't they build it there? We could end up with a sea of roofs like a caravan park looking down on us and invading our privacy which the current accommodation already does.

## Representation 2

Dear Glamorgan Spring Bay Council,

I am pleased with the revised plans for 50 Harveys Farm Road, DA 2022/33, however I do have some concerns.

The plans are for a new dwelling and extra visitors accommodation. We are concerned that the dwelling may also be used as short term visitors accommodation and would strongly oppose this use.

We also hope that the council will regularly monitor the sewage reticulation system so that there is no runoff into the lower area of the property and subsequent adjacent properties. We would hope there is a corresponding risk management strategy in case this does eventuate.

We are also concerned about future subdivision and strata title for this property. We would oppose any strata title of the rural residential zoned land and would insist that all subdivisions be in accordance with the current rural residential zoning.

We also will oppose any future residential accommodation being built on this land.

24 March, 2022

Mr Greg Ingham  
General Manager  
Glamorgan Spring Bay Council  
9 Melbourne Street  
PO Box 6  
TRIABUNNA Tas 7190

Dear Mr Ingham,

#### **Planning ref: DA 2022 / 033**

I am writing to express our strong opposition to the above planning application which has been made by Shane Gould Enterprises Pty Ltd.

The key elements of our opposition are as follows:

1. **Stormwater (and probably wastewater) runoff.** We already have personal experience of this problem. Water from the land in question (50 Harveys Farm Road) flows under the road and down across our property to the sea. We have owned our land [REDACTED] for many years and we have observed how the quality of the runoff water has deteriorated since 50 Harveys Farm Road has been developed. The quantity of runoff appears to have increased, as would be expected with the construction of buildings and impermeable / semipermeable surfaces – but we cannot quantify this. However, one aspect is without doubt: the quality of the water running across our property had deteriorated – there is much more mud and silt than before building commenced on 50 Harveys Farm Road. It is certain that this situation will only worsen with the construction of more buildings and hard surfaces.
2. **Noise, activity and general disturbance to the ambience of the area.** The ‘atmosphere’ associated with the local area is something which we residents really appreciate and enjoy. There are lovely views and the area is quiet and tranquil. A commercial development such as is proposed by Shane Gould Enterprises will significantly detract from this. When Shane Gould and Milton Nelms bought this block, we expected they would build a house and live there – so we immediately visited, met with Milt, and welcomed them with open arms. But it is now apparent that they are, in fact, simply commercial property developers. First one

house has been approved and built. Now it is proposed to build two more houses. And the layout of houses on the block strongly suggests that there may eventually be up to eight (8) houses covered by strata title. This is not what the residents of Harveys Farm Road want. There will be boats and trailers, caravans and vehicles jostling for access through a narrow entrance on a dangerous bend in the road. And all these houses and vehicles, clustered together on what is quite a small block in a rural area, will be an eyesore – how much more pleasant a single house (such as now exists on the block) would be. We personally have had experience with rental property next door to us and we can assure you that such a situation detracts from the enjoyment of life of permanent residents nearby.

In summary, this proposed development clearly offers the potential for Shane Gould Enterprises to make a lot of money. But there are only downsides to such a development for the nearby residents of Harveys Farm Road – there is not one single upside to this development from our point of view. Such a commercial development is totally inappropriate in this beautiful rural environment.

We strongly request that this building application be rejected by council. Let us keep Harveys Farm Road for the residents rather than move one more step towards being a Surfers Paradise on the beautiful east coast of Tasmania.

[REDACTED]

## Representation 4

Greg Ingham  
General Manager  
Glamorgan Spring Bay Council  
[planning@freycinet.tas.gov.au](mailto:planning@freycinet.tas.gov.au)

Dear Mr Ingham

**Re: Response to Application DA 2022 / 033     50 Harveys Farm Road**

We raise a number of issues for Council's consideration in relation to the proposed development at 50 Harvey's Farm Road. It is noted that this application is an amendment to previous application DA2021/234 (withdrawn). This current proposal still indicates a level of accommodation density which is not consistent with the rural living experience along Harveys Farm Road (HFR) and not in accordance with the Rural Living Zone guidelines.

We refer to the Guideline No. 1 Local Provisions Schedule (LPS): zone and code application June 2018<sup>i</sup> and point out areas of the application that would seem to be in contravention of the guidelines.

Due to the density of development proposed on the site, the proposal fails to protect

- residential amenity (11.1.1 RLZ1 (a))
- existing natural and landscape values of the area – especially being the rural character of the community (11.1.1 (b))

The proposal will cause loss of amenity to the predominately permanent neighbours through increase noise, scale intensity, traffic generation and movement in the area. (11.1.3)

The proposed visitor accommodation is not compatible with the residential character of the immediate surrounds. (11.1.4)

As noted in the planning application, a range of residences, including visitor/holiday accommodation exist along HFR. A key difference, however, is that existing accommodation is low density, has minimal visual impact from neighbouring properties, and the majority accommodate permanent residents.

The number of dwellings proposed in this application will have a significant impact on already overburdened infrastructure on HFR including increased traffic, increased demand on water supply, and potential for increased run-off into neighbouring dams. The proposal indicates a level of accommodation density that is more suited to a holiday village in a residential zone with appropriate infrastructure.

This is the second planning application to come before Council for this property in a relatively short period of time. This drip-feed approach to development of this property is concerning.

Residents of HFR have significantly invested to reside in a rural living zone. The impact of such a development as proposed at 50 HFR will be considerable, and will likely lead to setting a precedent, altering the rural living qualities that currently exist. Certainty and consistency regarding Council's planning process would assure residents of HFR that a rural lifestyle will be maintained in this rural living zone.

---

<sup>i</sup> Tasmanian Planning Commission under section 8A of the Land Use Planning and Approvals Act 1993 with the approval of the Minister for Planning and Local Government.

## Representation 5

Greg Ingham  
General Manager  
Glamorgan Spring Bay Council  
planning@freycinet.tas.gov.au

25 March, 2022

Dear Mr Ingham

**Planning ref: DA 2022 / 033**

### **1. Increased Traffic**

Harveys Farm Road is narrow. There are areas that require one car to pull onto the verge if there is an oncoming car. While the application did not tick the box for commercial vehicles accessing the site, there will be the need for the linen truck, the cleaners, wood deliveries and various maintenance vehicles. If each bedroom on the development site has one car, that equates to an extra 7 vehicles entering and exiting the most dangerous corner on Harveys Farm Road. Last year there was an accident that saw a car written off on the power pole coming around that corner.

As a cyclist in Bicheno, I find Harveys Farm Road one of the more difficult roads to navigate in Bicheno. Additional vehicles on the road, not only during construction, but also if the project is completed, will make this a more hazardous road for me.

### **2. Increased population density**

According to Booking.com the current visitor accommodation at 50 Harveys Farm Road will accept 5 adults in the 2 bedroom residence.

The proposal is for an additional 1 x 3 bedroom and 1 x 2 bedroom. Given that the current 2 bedroom unit accepts 5 people (sofa bed available according to website), it can be assumed that the 1 x 3 bedroom unit will accept will 7-8 people and the 1 x 2 bedroom up to 5 people. This equates to potentially 17-18 visitors onsite every night.

These calculations assume that all guests adhere to the maximum capacity. There have been several times since Wildflower Sands Coastal Retreat opened where there were well over the 5 adult maximum. I understand that this is difficult to manage when the owners do not live onsite, however it should be taken into consideration that there will be times when there will be more than 18 visitors onsite.

Such a density is not in keeping with the semi-rural lifestyle that the residents of Harveys Farm Road have bought into and thus agreed upon. There are many other places in Bicheno where this density is feasible and expected. Harveys Farm Road is not one of them.

### **3. Decrease air quality**

The proposed buildings all have wood heaters. The site is in a low section of Harveys Farm Road. At night time this low area is visible as the fog gathers on the road around this property, starting at the driveway to number 32 Harveys Farm Road and extending to Courland Bay Road turnoff. Wood smoke generated by the three wood fire heaters will collect and decrease the air quality of the surrounding properties.

### **4. Storm water discharge**

The current disposal of storm water on Harveys Farm Road is inadequate. A look at the road after even a moderate rain event sees driveways washed across the road, water collecting in the ditch and verge. The storm water from 50 Harveys Farm Road currently flows into the dams at 43 and 59 Harveys Farm Road.

I use the water from the dam at 59 Harveys Farm Road for irrigating an extensive vegetable garden that feeds not only us, but also other areas of the community. It is imperative that the water in this dam is not contaminated.

It is unavoidable that with an extra 13 people, 4 bathrooms, potentially 2 outdoor showers and 2 washing machines, there will be issues with grey water in our dam. With the removal of vegetation there will also be extra run off from the site. During building, while not legal, it seems unavoidable that there will be run off from paint washing, concreting and plastering. No matter how well a site is managed, there is always building material run off.

I strongly oppose the development on this ground.

### **5. Increased light pollution**

The external lights on the existing building are overpowering. Adding another 2 buildings will increase light pollution which in turn affects wildlife and adds a visual disturbance to negotiating the corner at night.

I would like to end on a note regarding the attached letter from Dr Shane Gould and Milton Nelms in the section "Developer Details". Their accomplishments are, undoubtedly, praiseworthy. However, an individual's accomplishments should not factor in an Application Permit to the Council. We all have our own accomplishments that often go unpraised and uncertified. We all contribute to the Community of Bicheno in various ways that keep our town ticking behind the scenes. We do it without public acknowledgement. To imply that their public achievements and public servitude gives a greater weight than the residents of Harveys Farm Road is offensive.

**GLAMORGAN/SPRING BAY COUNCIL**  
**NOTICE OF PROPOSED DEVELOPMENT**

Notice is hereby given that an application has been made for planning approval for the following development.

**SITE:** 55 Waubs Esplanade Bicheno

**PROPOSAL:** House Relocation

Any person may make representation on the application(s) by letter (PO Box 6, Triabunna) or electronic mail ([planning@freycinet.tas.gov.au](mailto:planning@freycinet.tas.gov.au)) addressed to the General Manager.

Representations must be received before midnight on 25 March 2022.

### Advice:

Use this form for all no permit required, permitted and discretionary planning applications including subdivision as well as for planning scheme amendment & minor amendments to permits.

Completing this form in full will help ensure that all necessary information is provided and avoid any delay. The planning scheme in clause 6.0 provides details of other information that may be required and in each applicable Code.

Often, it is beneficial to provide a separate written submission explaining in general terms what is proposed and why and to justify the proposal against any applicable performance criteria.

If you have any queries with the form or what information is required please contact the office.

### Details of Applicant & Owner

Applicant:	PAUL MILTENBURG

Representations prepared  
for GSB Council Meeting

27 April 2022

received for

**DA2022/48**

55Waubs Bay Esplanade Bicheno

## Representation 1

Attention: The General Manager

Please see below my request for further information regarding planning Application DA 2022 / 048, re: 55 Waubs Esplanade, Bicheno.

A] The stated area of land on application of 976 square metres is misleading as the property (No.55) has been or is about to be subdivided. The actual size of the area of land on which the relocated house will sit is 528m<sup>2</sup>. Is this correct?

B] The proposed building is only 1.27m from the existing house (at No.57), and this measurement is a lot less when the roof overhang is taken into account. This is extremely close, especially in the case of fire.

When the next door block is built on, to within 1metre of the boundary, then you have an extremely compact area that is not in keeping with the ambience of Bicheno, and may result in loss of amenity. Council are well aware and have promoted the Bicheno amenity.

C] The Pool. A suspended industrial steel container within close proximity to existing house in the area is less than desirable. No mention of height and finish coating of container. Height of container privacy screen is far too low for privacy and safety. What are the screens to be built with?

D] Will the relocated house be stored on the land before reconstruction commences and if so for how long? Will a permit be required?

E] Does the council have any requirements that all exterior materials of the relocated house are finished off to a reasonable/high standard? For example, will the roof have to be painted or at least the new material match the existing and so on? The concern is the potential of this project to detrimentally affect the amenity of the neighbourhood.

F] The planning application form is missing some detail re property ownership ?

## Representation 2

Attention: General Manager

**Re: Planning Application DA 2022/048  
House Relocation - 55 Waubs Esplanade Bicheno**

We wish to place an objection to the planning application above due to it being in excess of the building height permitted in this protected area.

However, we are supportive of the proposed house relocation if it can be erected at the allowed height requirement.

We are the owners of a property at [REDACTED] We look directly over the above property and feel concerned that the current proposed height of the building is detrimental to the area and skyline. If permitted, this will set a precedence for future applications in this protected area.

We would appreciate a reply in receipt of this emailed objection.

### Representation 3

Attention: General Manager

I have a few concerns about the DA for 55 Waubs Esplanade, Bicheno

As the proposed house is a relocated house, what is the condition of the house?

Will the house have to be upgraded to today's standards, eg insulation, double glazed windows, electric wiring replaced etc etc?

The drawings of the house show only one outside entrance

As for the swimming pool being a second hand steel shipping container on stilts, how second hand can that be!!

How long do the security screens have to stay in place, as per the house on James Street that overlooks my property

The DA seems to be a bit unusual as the owner's ID has been covered up. It is only on one half of 55 Waubs Esplanade which will make it a small block, when it is subdivided. At the moment there is no water supply from TasWater for the house site.

As this is a discretionary application do we as neighbours have access to see the final plans?

The storm water from the proposed 2 blocks will not be able to go into mains as shown because of the capacity.

My wife and myself have been involved with Bicheno from the mid 1950's. The town has changed a lot, of course, in that time. Early times it had 2 hotels, 2 supermarkets, 2 service stations and a butchers shop. We have lived here permanently for 12 years and things have changed a lot, not for the better. The ambience of the town has changed a lot in that time with people buying blocks of land and putting 2 or 3 units on them or building huge houses which cover the whole block and block out existing houses

Bicheno is losing its fishing village feel, which is what people loved it for

Regards

The Action Plan .....	10

## Introduction

Council's Communication and Engagement Framework ("The Framework") outlines how we communicate and engage with the community, as well as the key initiatives and actions that we will take to improve communication and engagement between Council, stakeholders and the community.

We aim to build upon our current communication and engagement methods and activities ensuring consistent messaging across all platforms to reach a greater percentage of the community, to increase their knowledge of Council's activities and decisions, the outcomes of those decisions and how they can be involved.

The Framework has been developed to:

- Continue to improve the flow of information between Council and the community;
- Further increase transparency and provide opportunity for two-way communication;
- Ensure that all Council communications are timely and easily understood by all of our stakeholders;
- Ensure Council's communication and engagement activities meet the requirements set out in the *Local Government Act 1993*; and
- Consistently reflect Council's Purpose, Vision, Values and Objectives as outlined and adopted in Council's *Strategic Plan 2020-2029*

Council's *Strategic Plan 2020-2029*, focuses on Council's role in delivering the community's vision for the Glamorgan Spring Bay Municipality. This Framework is fundamentally linked to the objectives of the Strategic Plan, in particular objective six 'Draw on the knowledge and expertise of local people and communities in shaping and delivering our initiatives and plans - listening to and taking account of ideas and feedback from residents, businesses and ratepayers.'. Further to this, the development of a Communications and Engagement Framework was identified as an action in the *Annual Plan 2021-2022*.

Council are committed to the process of transparently sharing information and recognise the benefits that effective communication and engagement has for building the community's confidence in Council.

Effective communication and engagement requires input from all stakeholders. Both Council Staff and Councillors are responsible for the organisation's reputation. Everything we say and do impacts on the public's perception of Council. It is intended to undertake ongoing review of the effectiveness of communication activities implemented.

## Community Engagement Overview

Community Engagement is defined as a process whereby Council and the community exchange information and ideas. Engagement is focused on group shared roles and responsibilities, not personal interactions. Effective engagement should influence and inform decisions of Council and the community.

When effectively delivered, community engagement can lead to better outcomes for all with the following benefits:

### **To the Community**

- Improved community participation in Council's decisions.
- Better informed and resourced community with improved understanding of Council's policies, projects and decisions and actions.
- Enhanced feeling of inclusion and reduced feeling of real or perceived alienation and marginalisation, including the disenchantment associated with it. Even those whose opinions are not accepted have expressed their right to be heard and informed about the basis of the decision.
- Improved levels of satisfaction and ownership of problems and solutions.
- Appreciation of local knowledge systems and expertise.
- Empowerment for social change.

### **To the Council**

- Better quality decisions informed by an understanding of community values, needs and aspirations.
- Help plan and prioritise services to meet community expectation, including efficient use of resources.
- Provides opportunity to help the community understand issues, alternatives, opportunities and solutions.
- Builds positive image and confidence in Council's ability to deliver on services.
- Gains early buy in and strengthens trust and partnership.
- Proactive treatment of unforeseen issues and problems.

## Context

### Key Communication and Engagement Objectives

The Framework will support our Vision, Guiding Principles and Key Foundations of Glamorgan Spring Bay Council, specifically:

**Guiding Principle:**

*Draw on the knowledge and expertise of local people and communities in shaping and delivering our initiatives and plans – listening to and taking account of ideas and feedback from residents, businesses and ratepayers.*

**Key Foundation:**

*Cohesive, inclusive and resilient communities.*

**What we plan to do:**

*Create an informed and involved community by developing relevant and accessible communication channels.*

Council recognises that there is scope to build upon current community understanding of what Council does, Council's activities, how community feedback and interest is taken into account during decision making, as well as how Council advocates on behalf of the community.

The key objectives of The Framework are to:

1. Continue to assess the different communication needs of our community and apply appropriate engagement methodologies for the range of communication opportunities.
2. Increase the community's knowledge and understanding about Council decisions, policies, activities and services.
3. Make the most effective use of appropriate media and technologies.
4. Ensure that internal communication is effective.
5. Consult and engage regularly, and in a timely manner, with the community.
6. Promote Glamorgan Spring Bay Council and its activities in an articulate and consistent way.
7. Make it easy for people to find out about the Glamorgan Spring Bay Municipality.
8. Ensure what Council says about itself is consistent with the customer experience of Council.
9. Improve the way we communicate the outcomes of our projects, programs, activities and decisions.
10. Commit to detailing and communicating how community feedback influenced Council's plans, actions and advocacy.

## Principles That Guide the Way We Communicate and Engage

The Framework has been developed based on the following guiding principles for effective communication and engagement:

1. Prioritise communication and engagement that is proactive, positive, consistent and transparent.
2. Provide supporting information to assist stakeholders to make informed opinions.
3. Be inclusive and accessible to all members of the community.
4. Ensure that the broader views of the community are considered in the planning and decision making processes.

## Communications and Engagement Framework

The Communications and Engagement Framework outlines our approach to engaging with the community and stakeholders. It provides transparency and clarity for all stakeholders so they can understand their role in the decision-making process. The Framework outlines why, who and how we will engage on plans and policies, it also then identifies how we will evaluate and report. The level of community involvement varies depending on the project and the potential impact of the decision.

### Why we communicate and engage?

Council recognises the right of the community to be informed and have input into decisions which affect their lives. We value effective engagement in developing a positive relationship with our community, and acknowledges that in doing so, this will lead to better decision-making. We seek to take account of the views, needs, issues and aspirations expressed by the community and to balance these with other influences, such as budgetary and legislative constraints, to make informed decisions

### Who we communicate and engage with?

The key stakeholders Glamorgan Spring Bay Council regularly communicates and engages with include:

- Residents and rate payers;
- Local businesses;
- Community groups including but not limited to 'Friends of' groups; Groups representing localities within the municipality and Special Interest groups;
- Visitors and tourists;
- Councillors;
- Politicians, both Federal and State;
- Agencies such as Federal and State Government departments, industry groups including Chambers of Commerce and not-for-profit groups; and
- Regulatory and peak bodies such as auditors, Local Government Association (LGAT), Local Government Division, Southern Tasmanian Councils Authority, Environmental Protection Authority etc.
- Partnership Engagement: Municipal, regional and state based stakeholders for inter-agency outcomes

These groups are unique and have different interests in Council functions and activities. Therefore, our communication and engagement approach with these groups needs to suit their differing requirements, whilst also being consistent with Council's objectives. Partnership Engagement also provides two way communication where the municipalities interests are communicated to wider interests and the impacts from wider interests are made known for communication into community.

## How We Communicate and Engage

The IAP2 (International Association of Public Participation) Spectrum ([www.iap2.org.au](http://www.iap2.org.au)) shows that differing levels of participation are legitimate depending on the goals, timeframes, resources and levels of concern in the decision to be made.

Public Participation Goal	Promise to the Public	Examples
Inform	Provide Information to the Community	Fact Sheets Website
Consult	Obtain community input	Focus Groups Surveys
Involve	Work directly with the community throughout the process	Workshops
Collaborate	Create partnerships with groups within the community to be involved on an ongoing basis	Resident Advisory Committees
Empowerment	To place final decision making in the hands of the community	Ballots Elector Polls

Council provides a range of ways for the community and stakeholders to participate in the decision-making process, these are outlined in the following table

Participation	Channel	In Practice
<b>Inform</b>	<b>Website and social media</b>	Provide information via Facebook and the Council's website.
	<b>Advertisements, signs, letters and notices</b>	A letter, sign, advertisement or notice may: <ul style="list-style-type: none"> <li>• invite the community to participate in engagement</li> <li>• describe the matter, project or issue</li> <li>• outline how people can find out more information</li> <li>• advise how to make a comment or be involved</li> <li>• outline the timeframe for consultation.</li> </ul>
	<b>Council Office</b>	Information is made available during exhibition the Council Office.
	<b>Newsletters and publications</b>	Information will be made available through community newsletters and publications such as, SeaSpeak, East Coast View and The Mercury and Examiner Newspapers.
<b>Consult and involve</b>	<b>Community Connect meetings</b>	Informal community meetings held in locations around the Municipality. An opportunity for residents to engage with the Mayor, Councillors and Council Management Team on local issues of concern in an informal setting
	<b>Council meetings</b>	All Council decisions are made at the monthly meeting, and these are open to the public to attend, with meetings agendas available four days beforehand. Agendas contain extensive reporting on Council activities, projects and programs.
	<b>Public exhibitions and submissions</b>	The exhibition process seeks written community and stakeholder feedback on a plan, policy or project.
	<b>Surveys</b>	Using market research software for telephone, online, and offline surveys optimised for mobile phones and language translations.
	<b>Drop-in sessions and pop up stalls</b>	Provide a face to face opportunity for the community to attend a drop- in session or a pop up stall often held as part of a wider event to gather information and provide feedback on an issue or project/policy related decision.
<b>Collaborate and empower</b>	<b>Section 24 Special Committees of Council</b>	These committees are made up of various members of our community and Councillors who advise the Council on views, needs, and interests in the local area. Committee members are selected because of their experience or skill in the area relating to that committee interest.
	<b>Community and stakeholder reference groups</b>	Groups of community and stakeholders that meet with staff, Councillors, or others to work through an issue, determine a decision for a project, policy or plan and provide advice on the decision.

## Evaluation

Feedback mechanisms will be incorporated into communication and engagement activities to track and measure how effective they have been. The Engagement Evaluation Template is to be used for engagement activities.

Other evaluation mechanisms include:

- Website/social media analytics
- Surveys
- Meeting/email feedback
- Customer Service feedback

Evaluation will focus on consistency of message, levels of awareness, understanding and commitment of stakeholders, pockets of confusion and frequency. Stakeholder engagement activities and messages will be updated based on evaluation and feedback results

### **Evaluating and debriefing your engagement activity**

Evaluation may be carried out during the implementation phase to see if the engagement activities are delivering the right information or attracting the right stakeholders; as well as at the end of the process to see what could be done differently.

Evaluation and debriefing an engagement activity is important for staff development and training; and to work through any difficulties raised.

## Report

The most important part of any community engagement activity is demonstrating to participants that their views have been heard and that their time and input is valued.

A process must be established and identified within the engagement framework and plan. The community should be advised upfront so participants can understand how their information will be used throughout the project. The process used will depend on the depth of engagement you are conducting.

It does not mean that every sentiment or statement collected from the community can be implemented; there may be conflicting opinions in the community, or the subject may require more research. Rather it is a promise that a participant's time and contribution will be considered and respected.

Feedback to the participants can be in the form of a community engagement summary (synthesised findings) or a write up (verbatim) of the community's comments. It can be used as a way of keeping up the momentum of a project, while the project moves through Council's process (e.g. interim to a Council report).

The outcomes of how their contribution has affected decisions will also be communicated. Closing the loop is essential in building trust and transparency in the decision-making process

## The Action Plan

The Framework will be resourced under existing budget allocations wherever possible. Any identified programs and projects which require funding will be subject to approval in Council's Annual Plan and Budget.

OBJECTIVES	ACTIONS
1. Continue to assess the different communication needs of community.	<p><b>Key Stakeholder Interviews</b> Meet with key stakeholder groups to gain a deeper understanding of communication and engagement issues and seek effective solutions for them.</p> <p><b>Analyse the Customer Relationship Management (CRM) Data</b> See what people are contacting Council about and how we can address this at a communication and engagement level.</p>
2. To increase the community's knowledge and understanding about Council decisions, policies, activities and services.	<p><b>Current Projects Tab</b> Include a 'Current Projects' tab (or similar) on the website that is visible and regularly updated to ensure the most up to date information, with photos included where appropriate, is available.</p> <p><b>Have Your Say</b> Develop a 'Have Your Say' section on the website. This could include details of what community members are currently being asked to comment on, surveys and polls, upcoming community connect sessions, Council Meeting dates, Special Meeting dates and a link to the feedback form.</p> <p><b>Promote the Ways People Can Get Involved with Council</b> Regularly promote the ways residents can become involved with Council via the website, social media channels and East Coast View advert.</p> <p><b>Promote Councils Lobbying Efforts Better</b> Develop media releases and social media posts that demonstrate and promotes Council's advocacy activities and priorities.</p>
3. To make the most effective use of appropriate media and technologies.	<p><b>Online Accessibility</b> Work towards implementing online communication materials that meet accessibility requirements for residents of all abilities.</p> <p><b>Social Media Trends</b> Keep up to date with the current trends in social media to ensure we are communicating via the channels our community is most engaged with.</p> <p><b>Emails</b> Trial using an email provider such as Mail Chimp to communicate Council works updates, Council decisions and Have Your Say items.</p>

4. To ensure that internal communication is effective.	<p><b>Intranet Review and Refresh</b></p> <p>Undertake a review of the Intranet and implement identified actions from the staff survey to ensure the Intranet becomes the core hub for internal communication. Actions to implement include:</p> <ul style="list-style-type: none"> <li>• A live Corporate Calendar</li> <li>• A Council Noticeboard</li> <li>• HR Updates</li> <li>• Council's social media pages posts</li> <li>• Events Calendar</li> <li>• Link to job vacancies on website</li> <li>• Staff contact listing and seating chart</li> <li>• General Managers Updates</li> <li>• Current Council Works and Projects</li> </ul>
5. To consult and engage regularly with the community.	<p><b>Have Your Say</b></p> <p>Develop a Have Your Say section on the website. This could include details of what community members are currently being asked to comment on, surveys and polls, upcoming community conversation sessions, Council Meeting dates, Special Meeting dates and a link to the feedback form.</p> <p><b>Promote the Ways People Can Get Involved with Council</b></p> <p>Regularly promote the ways residents can become involved with Council via the website, social media channels and East Coast View advert.</p> <p><b>Review the Structure of Community Connect Sessions</b></p> <p>Review the structure of these meetings to ensure they are meeting the needs of Council and the community.</p> <p><b>Project Management Plans</b></p> <p>Review the 'Stakeholder Engagement' sections of the Project Management Plan templates to ensure they meet the requirements of the community.</p>
6. To promote Glamorgan Spring Bay Council and its activities in an articulate and consistent way.	<p><b>Branding Audit</b></p> <p>Complete an audit of Council's branding to ensure consistency in its use across the Municipality.</p> <p><b>Style Guide</b></p> <p>Create a Council Style Guide to provide guidelines for the way all Council branded documents and publications should be presented from both a graphic and language perspective.</p>
7. To make it easy for people to find out about the Glamorgan Spring Bay Municipality.	<p><b>Website Review</b></p> <p>Undertake a review of Council's public website. Investigate an upgrade to make it more user friendly and easier for people to find the information and/or documentation they need (subject to budget and/or resourcing approval). Ensure all information is presented in an articulate and consistent way in line with Council's objectives and key messages. Actions include:</p> <ul style="list-style-type: none"> <li>• Create a <i>Current Projects</i> tab</li> <li>• Create a <i>Have Your Say</i> tab</li> <li>• Tourist Information tab</li> </ul>

<p>8. Ensure what Council says about itself is consistent with the customer experience of Council.</p>	<p><b>Customer Service Charter</b> Refresh all staff on the standards outlined in the Customer Service Charter.</p> <p><b>Customer Service Survey</b> Analyse the data from the Customer Service Survey to find out how we are going and areas for improvement.</p> <p><b>Councillor Feedback</b> Periodically ask Councillors what feedback they are receiving about Council.</p>
<p>9. To improve the way we communicate the outcomes of our programs and activities.</p>	<p><b>Go One Step Further</b> When communicating the outcomes of Council projects, programs and decisions make the outcomes for the community clear, relatable, measurable and in plain English, including before and after photos where appropriate.</p>
<p>10. A commitment to detailing and communicating how community feedback influenced Council's plans, actions and advocacy.</p>	<p><b>Community Conversations Report</b> Report yearly on the issues and themes identified at Council's Community Connect meetings and Council's response and actions taken to address them.</p> <p><b>Community Consultation Feedback</b> Following community consultation Council will report back to the community and provide clear feedback on how their input influenced the plan/strategy/decision.</p>

## DELEGATION

A Council, in writing, may delegate with or without conditions to the General Manager, any of its functions or powers under any Act.

### **S.22 Local Government Act 1993 (subject to restrictions).**

*The General Manager, in writing, may delegate to an employee of the Council*  
*(a) any functions or powers under any Act, other than this power of delegation; and*  
*(b) any functions or powers delegated by the Council which the Council authorised the General Manager to delegate.*

### **S.64 Local Government Act 1993.**

*If an Act confers a power on a person to delegate a function or power, the person may, in accordance with the Act, delegate the function or power to*  
*(a) a person by name; or*  
*(b) the holder of a particular office or position by reference to the title of the office or position concerned, whether or not the office or position is vacant at the time of the delegation.*

### **S.23AA(1) of the Acts Interpretation Act 1931.**

*If a function or power is delegated to a particular officer or the holder of a particular office or position*  
*(a) the delegation does not cease to have effect merely because the person who was the particular officer or the holder of the particular office or position when the function or power was delegated ceases to be that officer or the holder of that office or position; and*  
*(b) the function or power may be performed or exercised by the person for the time being occupying or acting in the office or position concerned.*

### **S.23AA(5) of the Acts Interpretation Act 1931.**

*A function or power that has been delegated may, notwithstanding the delegation, be exercised by the delegator.*

### **S.23AA(6) of the Acts Interpretation Act 1931.**

Pursuant to the powers of the *Local Government Act 1993* the Council hereby delegates the exercise and performance of the following functions and powers to the General Manager and/or an Officer/employee of Council on the following conditions:

- I Each delegation is subject to the conditions or restrictions (if any) referred to in the table to this delegation.
  - II Each delegation is subject to such policies, policy guidelines and directions as the Council may from time to time approve.
  - III Each delegation is subject to Council's By-laws or the provision of any Act.
  - IV Each delegation includes any person acting in the delegated positions.
-

For and on behalf of the Glamorgan Spring Bay Council

The Glamorgan Spring Bay Council pursuant to a resolution of Council Number <insert number> dated **26 April 2022** hereby approved these delegation.

Signed on the <insert date>

Robert Young  
**MAYOR**

Greg Ingham  
**GENERAL MANAGER**

### COMMUNITY SMALL GRANTS APPLICATION FORM

Name of applicant	Bicheno Beams
Postal address	[REDACTED]
Contact person	David Reed
Role if group applying	Sub Committee of the BCDA - the incorporated Body
Contact number	[REDACTED]
Email address	[REDACTED]
Is your organisation an incorporated body?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Project title and brief description (If insufficient space, please attach additional sheet)	
<p>Bicheno Beams is a mesmerising laser light show with multi coloured lasers dancing across the night sky choreographed to a music track that is streamed on line that resonates with indigenous undertones and pulsating rhythms</p> <p>If you came across it in Paris you would be startled - if you paid for it in Sydney you would be thrilled</p> <p>to discover it in Bicheno for free - you would be astounded !</p> <p>Established in August 2021 with significant grant monies - this high value production cannot be replicated regionally without major resources being applied</p> <p>The experience is enhanced by a personal "meet and greet" from local volunteers who host the show each night.</p> <p>Outline intended outcomes of the project (for example, benefits of the project to the community, support from any other groups or organisations.</p> <p>This project puts a real focus on Bicheno and the East Coast as a winter destination</p> <p>in its second year - Bicheno Beams is set to improve July dramatically from a quiet time of year to a height of evening family activity.</p> <p>Last Year 7000 visitors attended Bicheno Beams over 6 weeks - we are expecting the same this year</p> <p>in the 4 weeks of July</p> <p>it is a "winter activation project" that bings the town together , builds confidence and continues economic activity into the off season</p>	
Funding sought from Council	\$1000
Funding to be contributed by you or your organisation	\$8000
Funding to be contributed from other organisations (Provide details below of confirmed or anticipated contributions *)	\$62000
Total Project Expenses	\$71000
Signed	[REDACTED]
Name (Please print)	David Reed
Date	16 Feb 2022
*Details of other contributors:	The Major funding partner is Austrade - who granted funds over 2 years to make this event happen as a regional rejuvenation program post covid .

**Subject:** Re: Community Small Grant Program

Hi Eliza

I have asked the BCDA to get a document together about our committee arrangements for you.

On the other matter of what we are short of - we have an income of \$46627 and an expenditure of \$61655- and so we have a shortfall of \$15028

we are raising monies through various means and receiving wholehearted business and community support.

we would love to consider any further funding avenues that you might suggest

one of the costs is the hire of Bicheno Carriers to use their truck and crane to move equipment before and after the event to and from Lions Park

The cost is \$1650. if that could be met that would be terrific and that money is being spent in our local community.

I wonder if that is the sort of element you might have been considering?

Kind regards

David.

BICHENO COMMUNITY DEVELOPMENT ASSOCIATION INC.  
P.O. Box 3 Bicheno, Tasmania 7215

14 April 2022

Dear Sir / Madam

This is to certify that the Bicheno Destination Marketing Group (DMG) is a sub-committee of the Bicheno Community Development Association Inc (BCDA). David Reed is the Chair of this sub-committee.

The DMG is responsible for the running of the Bicheno Beams event, including creation of the laser shows, staging the event each night and organising volunteers and paid staff. BCDA owns the laser equipment and provides statutory and accounting support to the DMG.

Kind regards,

Tony McLeod

BCDA President

GLAMORGAN SPRING BAY  
COUNCIL

## Expressions of Interest Application Form for Membership Section 24 Special Committees of Council

**Date:** 22/02/2022

**First Name:** Howard

**Surname:** Colvin

**Address:** 19-21 Wedge St  
Swansea 7190

**Phone:**

**Mobile:** 0438 881736

**E-mail Address:** hd.colvin@bigpond.com

**Name of Section 24 Special Committee of Council:**

Natural Resource Management Committee

**Please briefly describe your reasons for wanting to be a member of this committee:**

I've been a GSB ratepayer for some years but only recently been able to move here and retire. This is an opportunity to contribute to my community utilising several decades of professional NRM experience.

**Relevant skills, interests or expertise you will bring to the committee:**

Inaugural Executive Officer; NRM North (oversight over development of the Northern Tasmanian Regional NRM Strategy). Consultant negotiator of RFA conservation agreements and forest practices compensation agreements. Evaluation Officer; Natural Heritage Trust Unit. Chair, 1997 State of the Environment Report Lands Advisory Committee. Governance Support Officer; Tasmanian Landcare Association. Facilitated numerous vegetation, water and land management projects and strategies. Established NRM partnership agreements with the 9 Northern councils. Wide experience in community development, mediation and disaster resilience/recovery.

**Please list any potential conflicts of interest:**

My partner is employed in an administration role at NRM North until 16 March 2022 (then retiring).

I have no political or NRM related allegiances or memberships.

**Applicant Declaration:**

*I have read the Glamorgan Spring Bay Council Guidelines for Section 24 Special Committees of Council and understand that should my application be successful as a volunteer member of a Section 24 Special Committee of Council I would be expected to behave in accordance with these guidelines and the Terms of Reference for the committee I am a member of.*

**Print Name:** Howard Colvin

**Date:** 23-2-22

## **Prosser River Mouth Master Plan - Advisory Group Terms of Reference**

### **Background:**

The Prosser River Mouth in the coastal township of Orford is a unique coastal foreshore popular for a range of recreational activities for permanent and non-permanent residents.

It is also significant for its natural values in particular the ephemeral sand spit, which is formally recognised by BirdLife International as the *Orford (Tasmania) Important Bird Area (IBA)*<sup>1</sup>. The IBA supports breeding populations of shorebirds and small terns. Both the Fairy Terns and Hooded Plovers that nest within the IBA are listed under the Federal *Environmental Protection and Biodiversity Conservation (EPBC) Act 1999*. The IBA is also used throughout the year for feeding and roosting by migratory shorebirds from New Zealand and the Northern Hemisphere.

Over 2017-2018 Marine and Safety Tasmania (MAST) together with the Department of State Growth and the Glamorgan Spring Bay Council (GSBC) undertook a project to dredge and channelise the river to provide a pleasure boat facility. This has involved the installation of large sandbags on either side of the entrance. There are ongoing management implications associated with this project, potentially also outside of the actual project footprint, including dredging and sand relocation.

There are a number of public land titles within the greater area and the land tenure of each title varies and as such is covered by different legislation with differing management arrangements. The attached map (Appendix A) is the suggested area that the Master Plan is considering although the focus of the *Advisory Group* would be the public land.

The physical changes to the river mouth has already had significant implications not only for the natural values within the area (*BirdLife Tasmania Technical Report 2018-10*) but overall to the way that the area is now used. Combined with the ever increasing visitor numbers to the area together with the impacts of climate change such as coastal inundation (*AECOM, 2016*) and flooding there will continue to be changes to how the area is and can be used and therefore to how it is managed.

The idea of developing a Master Plan evolved from many discussions around the implications of these changes by various stakeholders including GSBC staff, Parks and Wildlife Service (PWS), Taswater, State Growth and MAST. The development and implementation of a Master Plan needs to involve all key stakeholders (GSBC, MAST, Birdlife Tasmania and Community Groups/Associations).

In order to identify some key physical and environmental elements within the area, an early draft Master Plan map of the core river mouth area was developed by Gilby + Brewin Architecture / Urban Design.

In November 2018, the newly elected Council held a workshop following concerns expressed by the community that fencing of the area had been undertaken without consultation and without formal

---

<sup>1</sup> [http://datazone.birdlife.org/site/factsheet/orford-\(tasmania\)-iba-australia](http://datazone.birdlife.org/site/factsheet/orford-(tasmania)-iba-australia)

Council endorsement. It was subsequently agreed that a working group would be established involving representatives from Council, local residents/ratepayers and relevant stakeholder groups to consider options for presentation to the Council prior to formal release to the community for broader input.

**Objectives of Prosser River Master Plan Advisory Group (the Group):**

To develop options for a Master Plan to facilitate improved shared use and strategic management of the area by:

- Identifying options to protect the important bird values within the Orford Bird Sanctuary;
- Identifying public works to improve the appearance, amenity and use of the area including but not limited to walking tracks, picnic tables, vehicle parking, toilets, seating, fences/barriers, and vegetation management;
- Identifying preferred locations and design parameters or concept designs that consider public use, vistas, key views lines, recreational uses, cultural values and environmental values in the site;
- Providing an overall plan for parking including boat trailer parking at the public boat ramp; and
- Improving connectivity throughout the area from either the northern or southern entrance to the town centre via strategic wayfinding through paths and signage the direct people to appropriate locations for specific activities.

**Term:**

The Advisory Group will remain in place until such time as it has fulfilled the above objectives. It is expected that the proposed Master Plan with associated options will be presented to Council within four months of the group being formed.

**Membership:**

- Glamorgan Spring Bay Council (elected representatives and relevant staff)
- Local Residents/Ratepayers (a maximum of four positions to be sourced via an EOI process, with a Council subcommittee to determine representation)
- DPIPWE land management agencies (Parks and Wildlife Service and Crown Land Services)
- Marine and Safety Tasmania (MAST)
- Bird Life Tasmania (BLT)
- Tarfish

\*Other specialists may be invited as required by the Group for example coastal process experts, Surf Life Saving Tasmania, DPIPWE Natural and Cultural Heritage.

### **Roles and Responsibilities:**

The *Group* is accountable for:

- fostering collaboration;
- removing obstacles to the successful development, delivery and adoption of the Master Plan;
- maintaining at all times the focus of the *Group* on the agreed scope, outcomes and benefits; and
- monitoring and managing the factors outside the *Group's* control that are critical to its success.

The membership of the *Group* will commit to:

- attending all scheduled *Group* meetings (or participating via telephone or video link);
- sharing all relevant communications and information across all *Group* members;
- making timely recommendations and taking action so as to not hold up the project; and
- notifying members of the *Group*, as soon as practical, if any matter arises which may be deemed to affect the development of the Master Plan.

Members of the *Group* will expect:

- that each member will be provided with complete, accurate and meaningful information in a timely manner;
- to be given reasonable time to make key recommendations;
- to be alerted to potential risks and issues that could impact the project, as they arise; and
- open and honest discussions, without resort to any misleading assertions

Out of Scope:

- Actions that contravene current National and state legislation.
- Intervention in current activities undertaken by land managers and or contractors.
- Making decisions or statements on behalf of the GSBC. The *Group* is an advisory body with powers limited to that of making recommendations to the Council (elected members) for decision.

### **Meetings**

A meeting quorum will be half the number of total members of the *Group*.

Meeting agendas and minutes will be provided by nominated Council officer this includes:

- Preparing agendas and supporting papers
- Preparing meeting notes and information.

Meetings will be held monthly for no more than two hours at the Glamorgan Spring Bay Council offices or onsite as required.

Councillor Robert Young  
Mayor  
Glamorgan Spring Bay Council  
[admin@freycinet.tas.gov.au](mailto:admin@freycinet.tas.gov.au)

Dear Mayor

The Tasmanian Government is endorsing a Commonwealth Government-funded business engagement program called Plastic Free Beaches which is being delivered by Boomerang Alliance. This program aims to assist local food retail businesses in selected municipalities adjacent to areas with significant natural values to switch away from using single-use plastic items.

The Department of Natural Resources and Environment Tasmania (formerly DPIPWE) has provided advice to Boomerang Alliance indicating that your municipality fits the environmental and social profile required for this project.

*Plastic Free Beaches* is a part of the national Plastic Free Places program, which has helped businesses across Australia eliminate nearly 10 million single-use plastic items. It is a partnership between Boomerang Alliance and the Australian Packaging Covenant Organisation. Projects operate across Australia, including Rockhampton, Noosa, Sydney, Perth, Adelaide and Cairns.

Boomerang Alliance works directly with food retailers and provides free assistance to make the transition away from single-use plastics (such as beverage containers, cutlery and coffee cups and lids) as simple as possible. It gives personalised advice on alternative products and solutions, and show businesses how to reduce packaging costs and waste. It also works with the supply chain to ensure suitable alternative products can be obtained.

Boomerang Alliance will support your local food businesses which get involved in the program to reduce plastic, litter and waste. Boomerang Alliance has indicated that it will provide measurable results.

For more information, please visit [www.plasticfreeplaces.org/council-overview](http://www.plasticfreeplaces.org/council-overview)

The program is free, and Boomerang Alliance advises they only require the following program support from participating councils:

1. Assistance to promote the program to your local food retail businesses.
2. Introductions to any relevant stakeholder organisations, e.g. trader's associations, business associations, Chambers of Commerce, tourism associations.

MIN21/44029

3. Promotion of the program and its members to the local community through media or social media opportunities.
4. Assist with any media (provide quotes or attend media opportunities).

Boomerang Alliance will work directly with councils to provide this assistance.

If you would like to participate, or require further information about the program, please contact Kellie Lindsay from Boomerang Alliance via email on [kellie.lindsay@boomerangalliance.org.au](mailto:kellie.lindsay@boomerangalliance.org.au) by 4 February 2022.

For more information about other Tasmanian Government initiatives around improving waste and resource recovery in Tasmania, please contact Alasdair Wells, Program Manager (Waste Policy and Programs), Natural Resources and Environment via email: [Alasdair.Wells@nre.tas.gov.au](mailto:Alasdair.Wells@nre.tas.gov.au)

Yours sincerely

22<sup>nd</sup> March 2022

Attn: Planning Department

Dear Sir/Madam,

I am writing this letter on behalf of Buckland residents, regarding the danger to children and their parents trying to walk to the school bus stops or the Buckland roadhouse.

Tasman highway as we are all aware is a very busy road at times. When school aged children and some younger children need to walk several hundred metres to school bus stops or the roadhouse, there is no footpath.

At present children and parents walk on the asphalt edge of the road until oncoming traffic forces them to move to the gravel verge. This verge is steeply graded in places, making it difficult with small children and especially so with a pram or stroller.

We are requesting a footpath to be constructed along Tasman highway in the Buckland township zone to prevent this very dangerous situation for our residents who wish to walk their children to the bus stops or roadhouse.

The names and addresses of concerned Buckland residents are listed below.

We expect the council to support and initiate the necessary action to remedy this problem as soon as possible.

Yours sincerely,

Tony Dowling for the Buckland residents.

## General Scope & Limitations

**Scope** - This report was commissioned as specified in Section 1 to Audit the proposed development for compliance with reference to the *Disability Discrimination Act 1992, the Access to Premises Standard 2010, and/or the National Construction Code and Australian Standard 1428.*

**Limitations** - The assessment has been undertaken and report provided on the understanding that; -

1. The report only deals with potential universal access issues and is limited to identification of non-compliance and or risks associated with non-compliance of the specified Act and Standards.
2. While all care is taken to provide accurate and up to date comments the report and recommendations contained within do not claim to encompass every aspect which may arise from the broader definition of "Access" under the Disability Discrimination Act.
3. To assure the integrity of the assessment the Auditor maintains a 3<sup>rd</sup> party independence from the design process.
4. The report only provides comments on access issues identified at the time and cannot be relied upon for any future or further development.
5. This report is site and solution specific it cannot be reproduced in-part or in-full for any other site or any other solution.
6. No assurance is given or inferred for the health, safety or amenity of the public, individuals or future occupants who utilise the accessible facilities and infrastructure that may be installed as a result of this report.
7. Due to the nature and complexity of access compliance it is highly recommended all construction works are supervised by a "Qualified & Experienced Access Assessor" to ensure that exposure to any claim under the Disability Discrimination Act can be minimised.
8. All other statutory assessments are outside the scope of this report.
9. The opinions held by the Author are based on material available at the time.
10. This report and its contents ARE NOT for general publication without the **expressed written consent** of the Author.

**No action or reliance is to be placed on this report; other than for which it was commissioned.**

## 1.0. Scope

Metrics Group was commissioned to undertake a Access Compliance Audit of the project as detailed against the intent of the Disability Discrimination Act 1992 and the Access to Premises Standard 2010.

## 2.0. Introduction

All organisations have a responsibility, under the federally legislated *Disability Discrimination Act 1992*, (DDA) to provide equitable access to goods and services and to premises used by the public including a workplace. Premises are broadly defined and would include all areas within a building.

The DDA provides uniform protection against unfair and unfavourable treatment for people with a disability in Australia. It also makes it unlawful to discriminate against associates, such as a career, friend or family member. The DDA supports the principle that people with a disability have the same fundamental rights as the rest of the community and this includes the opportunity to be employed, purchase goods and services, gain access to premises used by the public and the like.

Equitable and dignified access must be provided and where appropriate dignified access is not provided a complaint can be made under the DDA through the Human Rights and Equal Opportunity Commissioner.

## 3.0. Legislative Compliance

### **Disability Discrimination Act 1992**

The Federal Act has established the principals for uniform protection against unfair and unfavourable treatment for people with a disability in Australia and compels all organisations to provide "Access with dignity" for persons with a disability.

### **The Disability (Access to Premises – Buildings) Standards 2010**

Subordinate legislation (regulations) made under the Commonwealth's Disability Discrimination Act 1992 codifies the general building access requirements. It is referenced in the Tasmania Appendix to the BCA as a document to assist in the interpretation for implementation of the provisions in BCA Part D3.

### **The Tasmanian Building Act & Regulations 2016**

The state legislation for the control of building work, it requires all building and plumbing works to be undertaken to the National standards through the adoption of the National Construction Code, Building Code of Australia as the technical document for compliance of building & plumbing works. The Act establishes the certification & inspection process for ensuring standards are applied.

### **Building Code of Australia (BCA) / National Construction Code (NCC)**

The Building Code of Australia (Volume One of the National Construction Code series) is the legal standard for the design and construction of building work on Class 2 – 9 buildings. Since the 2011 edition, the BCA in Part D3 has incorporated revised access provisions that are almost identical to the provisions in the Disability (Access to Premises – Buildings) Standards 2010. Part D3 of Volume One contains the provisions for access for persons with a disability.

**Australian Standard 1428.1 2001 & 2009**

This Australian Standard covers general technical requirements for the design for access and mobility. Because AS1428.1 is referenced in the BCA and in the Disability (Access to Premises – Buildings) Standards 2010, compliance with its provisions satisfies compliance with BCA Volume One Part D3.

**Referenced Documents**

## 5.0. Access Audit

### 5.1. On Street Accessible Parking

Where opportunities allow, the provision of on-site accessible parking spaces is to be considered, designated on street. Generally accessible parking spaces should be provided at the following key destinations:

- **Village main streets/ activity strips** – commercial, retail, business hubs
- **Transport** – Railway stations, bus/rail interchanges
- **Community/cultural** – Near civic centres, cultural institutions, town halls, libraries, community centres, and health care
- **Parks/recreation** – destination/ high visitation facilities such as swimming pools, leisure centres regional/ district parks, foreshore, and sporting venues
- **Education** -Schools, tertiary institutions.

Guideline contains requirements and considerations for the design and placement of designated on street accessible parking **at key destinations** in the public space.

#### Objectives

As far as is practicable, new or relocated designated on street accessible parking spaces at key destinations is to be designed to be accessible to people with a range of disabilities, ambulant and non-ambulant.

The placement of designated on street accessible parking spaces is to take into consideration the accessibility of the street environment and existing infrastructure to ensure access outcomes are maximised.

Compliance Metric	Reference
1) As far as is practicable, new or relocated designated on street accessible parking spaces should be compliant with AS2890.5 (1993) Parking facilities Part 5: On Street Parking. In particular: a) Spaces should be, as far as is possible, between 5.5 and 6.7m long as required by AS2890.5 Figure 4.2(a). b) Spaces should be, as far as is possible, 3.2m wide as required by AS2890.5 Figure 4.2(a).	AS2890.5 1993
2) As an alternative solution designated on street accessible parking spaces should be placed at the end bay in the block to provide close proximity to existing kerb ramps at intersections, reducing the need for dedicated kerb ramps as shown in AS2890.5 Figures 4.2(a) and 4.2(b).	Alternative solution
3) The most accessible parking space within the each vicinity should be delivered. The following considerations will be made to maximise access outcomes for each space: a) The placement of new accessible parking spaces will take into consideration objects and infrastructure on the footpath adjacent to the accessible parking space to ensure there are no obstructions to access between the parking space and the kerb.	Additional guidance

- |  |  |
|--|--|
| <p>b) As far as is feasible, future accessible parking spaces will not be placed on uphill gradients, to avoid the risk while entering and exiting the vehicle.</p> <p>c) As far as is feasible, future accessible parking spaces will not be placed on bending roads with low visibility.</p> |  |
|--|--|

#### Project Specific Comment

1. Designated accessible parking should be located as close as practical to the entrance to the park.
2. Parking bay should be associated with a dedicated kerb ramp in front of the parking bay providing direct access from the bay to the footpath. This prevents people having to walk behind motor vehicles on the roadway towards a footpath kerb ramp crossing.

## 5.2. Footpaths

Footpaths enable pedestrians to make their journey in the public space, and provide opportunities for street trees and plants, street furniture and other infrastructure.

### Objectives

1. Footpaths should allow for a continuous accessible path of travel so that people with a range of disabilities are able to use it without encountering barriers or hazards.

<p>2. As far as possible, the continuous accessible path of travel on the footpath will be consistent and predictable. A predictable path of travel is one where the location can be anticipated by users through predictable layout or environmental cues.</p> <p>3. Where a hazard exists or protrudes within the continuous accessible path of travel, additional hazard warnings will be included to alert people who are blind or have low vision.</p> <p>4. People who are blind or have low vision will be able to navigate along the footpath.</p>	
Compliance Metric	Reference
<p><b>Continuous accessible path of travel</b></p> <p>1) A continuous accessible path of travel should be the most commonly used and direct path of travel.</p> <p>2) Features such as stairways, escalators, street furniture, landscaping and moving pathways, where they exist, should be located adjacent to and should not obstruct the continuous accessible path of travel.</p> <p>3) In most circumstances, footpath widths will be consistent with to accommodate a continuous accessible path of travel in both directions with a width of no less than 1800mm.</p> <p>4) Where the 1800mm width required cannot be met, a minimum of 1200mm (with frequent 1800mm passing opportunities for people passing in wheelchairs) is acceptable. In addition:</p> <p>5) Frequent passing opportunities should be provided at intervals of no less than every 20m where a direct line of sight is not available.</p> <p>6) A minimum clearance of 900mm between the back of a tree pit and the property boundary is permitted only on narrow footpaths where there is an existing street tree.</p> <p>7) A minimum of 2000mm height clearance should be provided and maintained on all continuous accessible paths of travel, except where the path of travel is also a shared path, in which case it should be 2400mm.</p> <p>8) Wherever possible, the continuous accessible path of travel should extend from the property line with no obstructions or projections in order to provide the most predictable and best possible shore line for all users including people who are blind or have low vision.</p>	<p>Australian Human Rights Commission 2013 Advisory Note on Streetscapes, public outdoor areas, fixtures, fittings and furniture</p> <p>Clause 8.2.10</p> <p>AS 1428.2 Clause 6.5a</p> <p>Australian Human Rights Commission: Access to Premises</p>
<p>9) Where a hazard exists, or protrudes within the continuous accessible path of travel, additional hazard warnings will be included to alert people who are blind or have low vision. These may include but are not limited to:</p> <p>a) higher luminance contrast (45 – 60%) of obstacle with surrounding paving materials, and</p> <p>b) appropriate use of Hazard TGSIs to warn of obstacle.</p>	<p>Alternative solution</p>
<p><b>Gradient, surface and cross fall</b></p> <p>1) While a footpath necessarily follows the natural topography of the area, in the best possible circumstances a continuous accessible path of travel along a footpath will:</p> <p>a) have a gradient of no steeper than 1 in 20</p> <p>b) have a cross fall of no steeper than 1 in 40 (or no steeper than 1 in 33 for bitumen surfaces)</p>	<p>Australian Human Rights Commission: Access to Premises – Frequently Asked Questions</p> <p>AS 4586 2013</p>

<p>c) be as smooth as possible without raised or cracked paving or tree root damage, and</p> <p>d) have a slip resistant surface during dry and wet conditions. Specifically, footpath materials when new will have a minimum slip resistance rating:</p> <ul style="list-style-type: none"> <li>• P 5 for ramps and footpaths steeper than 1:14.</li> <li>• P 4 for ramps and footpaths under 1:14.</li> </ul> <p>Note: A continuous accessible path of travel in the public domain does not require that access ramps complying with AS1428.1 are provided in instances where the gradient on the path of travel is in excess of the thresholds of 1 in 20.</p>	<p>Australian Human Rights Commission 2013 Advisory Note on Streetscapes, public outdoor areas, fixtures, fittings and furniture Clause 8.7</p>
---	---

### 5.3. Drain Grates & Pits

<p>To prevent p[pedestrian obstructions, slips trip[s and falls</p> <p><b>Objectives</b></p> <p>Grates will be heel-proof and be designed and oriented to ensure that they are not a trip risk for people using prams or accessible aids and wheelchair users.</p>	
Compliance Metric	Reference
1) All grates on footpaths, and other pedestrian surfaces (such as bridge decking) will be designed and installed in accordance with AS1428.1 Clause 7.5.	AS1428.1 2009 Clause 7.5

### 5.4. Street Furniture

<p>Street furniture includes public seating, garbage bins, water fountains, bicycle parking infrastructure and tree guards. Permanent furniture is fixed in the streetscape or in civic spaces. This infrastructure provides safety and amenity and supports people to enjoy their outing or journey. Providing seating increases accessibility and usability of facilities as the availability of rest stops can increase the walking range of people.</p> <p><b>Objectives</b></p> <ol style="list-style-type: none"> <li>1. Streetscapes and civic spaces will be designed so that street furniture does not obstruct the continuous accessible path of travel.</li> <li>2. Should street furniture obstruct the continuous accessible path of travel, appropriate hazard warnings will be provided.</li> <li>3. Street furniture will be designed to be accessible and visually detectable to people who are blind and have low vision, and people with accessible disabilities.</li> <li>4. Seating will be provided at regular intervals to provide predictable rest opportunities.</li> </ol> <p>Note: Where there are numerous seating opportunities available, a range of seating styles may be provided in addition to seating that complies with current Australian Standards</p>	
Compliance Metric	Reference
1) Street furniture (including seating, garbage bins, and water fountains, bicycle parking infrastructure and public telephones), will be located	Australian Human Rights Commission

<p>within a dedicated street furniture zone, located kerb-side or on kerb blisters, in order to keep the pedestrian zone and the continuous accessible path of travel free of obstructions. In particular:</p> <ul style="list-style-type: none"> <li>a) seats shall set back by a minimum of 500mm from the path of travel, and</li> <li>b) in civic spaces, all street furniture should be positioned on one side only of the continuous accessible path of travel.</li> </ul>	<p>2013 Advisory Note on Streetscapes, public outdoor areas, fixtures, fittings and furniture Clause 8.7.1</p> <p>AS1428.2 1992 Clause 27.1</p>
<p>2) Where street furniture obstructs the continuous accessible path of travel, additional hazard warning features will be incorporated as needed. These can include but are not limited to the following example:</p> <ul style="list-style-type: none"> <li>• the placement of hazard TGSIs in accordance with AS1428.4.1 Clause 2.6.</li> </ul> <p>3) Where the placement of street furniture creates impediments or hazards with less than 2000mm height clearance within or adjacent to the continuous accessible path of travel (such as public telephones and advertising boards that are not detectable by cane at ground level) contact with an overhead hazard shall be prevented by a suitable barrier such as:</p> <ul style="list-style-type: none"> <li>a) enclosing the area, or</li> <li>b) providing handrails with kerb rails in accordance with AS1428.1. In the absence of a suitable barrier, TGSIs shall be installed.</li> </ul>	<p>AS1428.4.1 2009 Clause 2.6</p>
<p>4) Street Furniture, including seating, tables, water fountains, and bins will be designed to be compliant with AS1428.2. Clause 27. In particular:</p> <ul style="list-style-type: none"> <li>a) Street furniture will be made of materials that have a minimum luminance contrast of 30% as per AS1428.2 Clause 27.1 (b). The contrast will be assessed with surrounding paving materials.</li> <li>b) As far as practicable, bubblers and water fountains will incorporate body lever controls (rather than push buttons) so as to be accessible to people with limited manual dexterity. They will also be designed to be accessible for wheelchair users.</li> </ul>	<p>AS1428.2 1992 Clause 27</p> <p>Additional guidance</p>
<p>5) Where only one style of permanent seating is provided, it will be designed to be compliant with AS1428.2 Clause 27.2 Seating in pedestrian areas. In particular:</p> <ul style="list-style-type: none"> <li>a) Seating will generally be a consistent height of 450mm as per AS1428.2 Clause 27.</li> <li>b) Seating will include arm rests at a height between 220mm and 300mm above seat, to provide to support people who have difficulty being seated or getting up from a seated position.</li> </ul>	<p>AS1428.2 1992 Clause 27.2</p>
<p>6) Within civic spaces that provide numerous different seating opportunities, a variety of styles which maximise the range of people that can be seated should be provided. These include:</p> <ul style="list-style-type: none"> <li>a) A minimum of 25% of seating options will have back and arm rests and will be compliant with AS1428.1 Clause 27. Specifically: <ul style="list-style-type: none"> <li>(i) arm rests at a height between 220mm and 300mm above seat</li> </ul> </li> </ul>	<p>AS1428.2 1992 Clause 27.2</p>

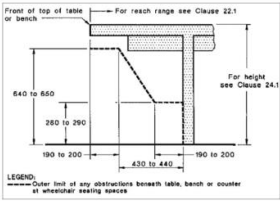

<p>(ii) a range of different seating heights (350mm, 450mm and 520mm) consistent with guidelines in AS1428.2 Clause 27).</p> <p>7) Some improvised and integrated seating – which may not be fully compliant with AS1428.2 – is permitted where there are some seating options within the immediate seating zone that comply with AS1428.2.</p>	
<p>8) Within civic spaces, as far as practicable, accessible seating, compliant with AS1428.2 Clause 27 will be provided at key locations such as at major entrances, at viewing areas, beneath shelter/shade.</p>	Best practice
<p>9) Consideration of the needs of wheelchair and accessible scooter users and families with prams will be made as far as possible throughout the site. This includes:</p> <p>a) A minimum of 1200mm circulation space around picnic furniture will be provided and maintained.</p> <p>b) Where a row of continuous seating is provided (either as singular unit or several units side by side), spaces for wheelchairs and prams will be provided at regular intervals so that people can sit with their family and friends.</p>	AS1428.2 1992 Clause 24.1
<p>Notes:</p> <ul style="list-style-type: none"> <li>• AS1428.2 recommends providing rest opportunities every 60m</li> <li>• Set seats and resting areas back from pathways should be at least 600mm to allow for suitable leg room and to ensure path clearances are maintained</li> <li>• Wheelchair resting places to be allocated next to bench seating</li> <li>• Minimum footprint for wheelchair resting places should be 800x1300mm</li> <li>• Armrests should be a flat profile for pushing off to stand</li> <li>• Seating/Benches without a seat back do not comply. Seating must have a back rest to comply with DDA provisions</li> <li>• Back rest maximum angle 105 degrees</li> <li>• Total back height between 750 and 800mm</li> </ul>	Best practice

## Examples

 <p>Backrest &amp; Handrails</p>	 <p>Backrest &amp; Handrails</p>	 <p>Wheelchair Bench Seat</p>
 <p>Wheelchair Bench Seat</p>		

Wheelchair Space Beside Bench	Wheelchair Space Beside Bench
 <p>Wheelchair Space BBQ Table</p>	 <p>AS1428.2 guide to table dimensions to provide clearance for wheelchair users.</p>

## 5.5. Lighting

Street lighting supports pedestrians to travel in the public domain at night, with safety and confidence. Lighting levels, quality and directionality are particularly important to people with low vision. Inappropriate lighting can disorient people with low vision.

### Objectives

1. Lighting will improve amenity and safety of all pedestrians.
2. Appropriate lux levels will provide people with greater confidence to independently navigate the streetscapes at night.
3. Lighting will facilitate orientation and wayfinding and assist in creating a safe and legible night time environment for all users.
4. Lighting infrastructure will not obstruct the continuous accessible path of travel.
5. Lighting along footpaths will be consistent.
6. The impact of glare will be minimised.

## 5.6. Signage & Wayfinding

A successful wayfinding system should be easy to understand, minimise anxiety, confusion, and allow for everyone to equitably access all information provided. Wayfinding relies on a succession of communication cues provided throughout an environment. Cues may be visual, audible or tactile.

The information below relates to pedestrian signage and wayfinding.

### Objectives

Wayfinding signage systems in the public domain will assist everyone, including people who are blind or have low vision and people with intellectual disability, to navigate around the municipality with ease and confidence. Wayfinding signage systems in the public domain should:

1. not obstruct the continuous accessible path of travel
2. be located in prominent positions adjacent to the continuous accessible path of travel so people can easily find and access information signs
3. be legible to people who are blind or have low vision
4. provide confirmation of destination
5. provide confirmation of current position and orientation
6. clearly identify the location of key destinations and amenities in the area, and
7. indicate the presence of any stairs.
8. Tactile and braille street signage will enable people who are blind or have low vision to identify their current location at every signalised intersection.

Compliance Metric	Reference
1) Wayfinding signage in the streetscape will: <ul style="list-style-type: none"> <li>a) be consistent with AS1428.2 Clause 17 (including Braille, tactile, viewing distances, sizing and placement of information on signage)</li> <li>b) use appropriate logos and international symbols for access</li> <li>c) be visible and recognisable</li> <li>d) use legible typeface with a minimum of 30% luminance contrast</li> <li>e) be accessible in other languages via mobile and digital technology</li> </ul>	2) AS1428.2 1992 Clause 17
2) Wayfinding signage will be located: <ul style="list-style-type: none"> <li>a) within the street furniture zone so as to not obstruct the continuous accessible path of travel, and</li> <li>b) as far as possible on an accessible surface.</li> </ul>	3) Best practice

### 5.7. Directional Tactile Ground Surface Indicators

**Tactile Ground Surface Indicators (TGSIs)** are installed on the ground or floor surface, designed to provide pedestrians who are blind or vision-impaired with warning or directional orientation information. TGSIs are discerned underfoot, by cane tip or by their contrasting colour. There are two types of TGSIs:

- **Raised dots** are hazard or warning TGSIs which indicate a nearby hazard.
- **Parallel raised lines** are directional TGSIs, which indicate the direction of travel.

For information about the use of hazard TGSIs with other elements please refer to:

- Section 8 for Kerb ramps

The use of Directional Tactile Ground Surface Indicators should be avoided as far as possible, as they can create discomfort to other pedestrians.

#### Objectives

1. The design of the streetscape or open space should as far as possible provide effective shorelines or environmental cues for people who are blind or have low vision to:
2. locate key infrastructure and destinations in open spaces
3. locate kerb ramps on the streetscape
4. navigate safely through medians and pedestrian islands.
5. Where no other shoreline is available or can be provided in the above circumstances, directional TGSIs will be installed in line with the specifications of AS1428.4.1.

Compliance Metric	Reference
1) In accordance with AS1428.4.1 (2009), Tactile Ground Surface Indicators may only be used in circumstances where: <ul style="list-style-type: none"> <li>a) there are insufficient shorelines or tactile environmental cues (such as handrails, building lines, and bollards) available to assist people to navigate to key destinations safely, and</li> <li>b) it is supported and required by AS1428.4.1, specifically (as per Appendix A3.3)               <ul style="list-style-type: none"> <li>i) at mid-block crossings to indicate the position of crossings, bus or tram stops</li> </ul> </li> </ul>	AS1428.4.1 2009, Appendix A3 and C3

<ul style="list-style-type: none"> <li>ii) at intersections that incorporate slip lane crossings to indicate the position of the crossing and the direction of travel across the island where the path of travel has not been cut through the island</li> <li>iii) at intersections where the point of entry to the road is more than 3000mm from the property line (see appendix C), and</li> <li>iv) across an open space from point A to point B where there are no other tactile or environmental cues.</li> </ul> <p>Note: Further detail on the use of directional tactile ground surface indicators is available in AS1428.4.1 (2009) A3 and C3. Readers are encouraged to review this appendix.</p>	
---	--

## 5.8. Kerb Ramps

Kerb ramps support wheelchair users, people with limited accessibility and parents with prams to smoothly transition from the footpath to the pedestrian street crossing environment in a safe and dignified way.

Kerb ramps also enable people who are blind or have low vision to detect that they are about to cross a road. When properly designed, they allow people who are blind or have low vision to orient themselves to the direction of travel across the road.

### Objectives

1. Kerb ramps will be designed to be detectable to people who are blind or have low vision, either by appropriate gradient of ramp or use of TGSIs.
2. Kerb ramps will assist people to safely cross the road by indicating the safe direction of travel through appropriate orientation and alignment of the kerb ramp with the direction of travel. The ramp will be aligned with the kerb ramp on the opposite side of the street, including at T intersections and mid-block crossings.
3. Kerb ramps will be designed to accommodate all pedestrians – including wheelchair users – without hazard.

Compliance Metric	Reference
<p>1) Public footpaths will have appropriate kerb ramps in accordance with AS1428.1. In particular, kerb ramps will:</p> <ul style="list-style-type: none"> <li>a) Be oriented in the direction of travel. Ramps on both sides of a carriageway must be aligned to one another and the direction of travel. In particular the crease between the ramp and the wings must align with the safe direction of travel to allow people who are blind or have low vision to orient themselves in the direction of travel. This includes at T intersections and mid block crossings.</li> </ul> <p>Ensure a smooth transition from the roadway to the ramp.</p>	AS1428.1 2009 Clause 10.7
<p>2) Tactile Ground Surface Indicators will be fitted at kerb ramps in accordance with AS1428.4.1. Refer Appendix C3 which emphasises that use of TGSIs should be minimised at kerb ramps.</p> <ul style="list-style-type: none"> <li>a) In particular warning TGSIs will be <i>only</i> provided on kerb ramps: <ul style="list-style-type: none"> <li>i) where the gradient is shallower than 1 in 8.5, and</li> <li>ii) that do not comply with the requirements of AS1428.1.</li> </ul> </li> </ul>	AS1428.4.1 2009 Appendix C3

<p>3) Both directional and hazard TGSIs will be provided with kerb ramps where the top of the AS1428.1 compliant ramp is more than 3000mm from the property line or the ramp is not aligned with the building line. Directional indicators will be provided from the property line to the top of the ramp and hazard TGSIs will be provided at the ramp.</p> <p>4) TGSIs will NOT be installed at kerb ramps where the following circumstances are met, as these conditions provide adequate change in level and orientation to be detectable by people who are blind or have low vision:</p> <ul style="list-style-type: none"> <li>a) the distance between the building line/boundary and the top of the kerb ramp is less than 3m;</li> <li>b) the change in gradient between that of the pedestrian surface at the top of the kerb ramp and the gradient of the kerb ramp surface lies between 1 in 8 to 1 in 8.5m;</li> <li>c) the kerb ramp is aligned with the building line and in the direction of travel across the carriageway.</li> </ul> <p>Note: Further detail on different kerb ramp design scenarios is available in AS1428.4.1 (2009) Appendix C3. Readers are encouraged to review this appendix.</p>	
--	--

## 5.9. Stairs & Ramps

Natural topography will always dictate whether a continuous accessible path of travel can be easily provided in a public space. In settings where stairs are required – spaces other than footpaths – for example, malls and plazas or other open spaces – every effort practicable should be made to maximise the accessibility of the area.

### Objectives

1. As far as is feasible, stairways, where they exist, should not be part of a continuous accessible path of travel and should be located adjacent to the continuous accessible path of travel.
2. Where the primary path of travel contains a topographical barrier requiring stairs, as far as is feasible, an alternative accessible route should be available nearby to ensure equity of access. This should be clearly signposted.
3. People who are blind or have low vision will be able to detect the presence of stairs before they have stepped onto them, to allow adequate warning and facilitate their safe use of the stairs.
4. Stairs will include handrails to assist those who need support to climb and descend stairs safely.
5. Stairs with diminishing risers will have additional contrast to be visually detectable from a range of approaches.
6. Ramps will be designed to provide accessible gradients, cross fall, appropriate turning points and landings, and handrails where appropriate.
7. Hazards adjacent to or underneath stairs and ramps will be detectable by people who are blind or have low vision.

Compliance Metric	Reference
<p>1) Stairs will be designed to be compliant with AS1428.1 and AS1428.4.1, specifically:</p> <ul style="list-style-type: none"> <li>a) Handrails shall be provided for all stairs in the public domain. They shall be designed to be compliant with AS1428.1 Clauses 11.2 and</li> </ul>	AS1428.1 2009 Clause 11.2

<p>12. Handrails should be provided on both sides of the stairs. Where this is not feasible, then a central handrail is acceptable.</p> <p>b) As far as is practicable stairs shall be set back by a minimum of 900mm so that the handrail and the TGSIs do not interrupt the continuous path of travel in accordance with AS1428.1 Clause 11.1 part (a).</p> <p>c) Stairs shall have opaque risers in accordance with AS1428.1 Clause 11.1 part (c).</p> <p>d) Stair risers should be consistent in height, and in the range between 115mm and 190mm height for each riser</p> <p>e) Open risers should not be used on stairways.</p> <p>f) Stair nosings shall have a minimum 30% luminance contrast with surrounding stair materials to make them visually detectable for people who have low vision in accordance with AS1428.1 Clause 11.1 part (f).</p> <p>g) TGSIs shall be installed at the top and bottom of stairways, ramps, escalators, and moving walks in accordance with AS1428.4.1. Clause 2.4.</p>	<p>AS1428.1 2009 Clause 12</p> <p>AS1428.1 2009 Clause 2.4</p> <p>NCC 2019 Vol 2 3.9.1.2 Stairway construction</p>
<p>2) As far as is feasible, where stairs are provided, an alternative accessway such as a ramp should be provided as close as possible (less than 50m away) to ensure equity of access. In addition:</p> <p>a) Where stairs cannot be avoided in a public domain setting and where the alternative accessway is more than 50m away, wayfinding information will direct pedestrians to the nearest accessible alternative route.</p> <p>b) The use of stair lifts should be avoided, as they are prone to breakdown if not regularly maintained.</p>	<p>Disability Access to premises – Building Standards 2010</p>
<p>3) In accordance with AS1428.4.1 Clause 2.6, where there are impediments or hazards with less than 2000mm height clearance within or adjacent to the continuous accessible path of travel (for example, under a stairway, ramp or walkway), contact with overhead hazard shall be prevented by a suitable barrier such as:</p> <p>a) enclosing the area, or</p> <p>b) providing handrails with kerb rails in accordance with AS1428.1.</p> <p>In the absence of a suitable barrier, TGSIs shall be installed.</p>	<p>AS1428.4.1 2009 Clause 2.6</p>
<p>4) Where stairs are incorporated within integrated seating, for example bleacher seating:</p> <p>a) TGSIs shall only be included at the top and bottom of the stair component – not at the top and bottom of the any other integrated elements, such as seating – so that a safe place to descend/ascend stairs is identifiable.</p> <p>b) Stairs shall be easily discernible from surrounding bleacher seating and have defined and consistent edging. This can be achieved through:</p> <p>i) the use of contrasting materials for the stairs and seating (minimum 30% luminance contrast), and</p> <p>ii) defined edges, and/or</p>	<p>Additional Guidance</p>

<p>iii) luminance contrasting strips on the nose of the bleacher seating, in addition to those required on the nose of the stair riser. Both should have minimum 30% luminance contrast.</p> <p>c) Additional elements should be put in place to prevent people who are blind or have low vision from stepping off the top bleacher. These can include, but are not limited to:</p> <ul style="list-style-type: none"> <li>i) barriers</li> <li>ii) seating, and</li> <li>iii) planting.</li> </ul>	
5) Where stairs in the public domain are provided on sloping topography resulting with diminishing risers, both stair risers and stair nosing's shall have a minimum 30% luminance contrast with surrounding stair materials.	Best Practice
<p>6) Ramps will be designed to be compliant with AS1428.1 and AS1428.4.1, specifically:</p> <ul style="list-style-type: none"> <li>a) Where a ramp is provided it will be designed in accordance with AS1428.1 Clauses 10.3 and 10.8 and AS1428.4.1 Clause 2.4 to ensure the inclusion appropriate gradients, width, cross fall, use of TGSIs, handrails and landing platforms.</li> <li>b) As far as practicable, ramps will be set back from the site boundary by 900mm so that the handrail and TGSIs do not protrude into the continuous path of travel. Refer AS1428.1 Clause 10.3 part (f).</li> <li>c) Maximum gradient 1:14 with horizontal landing to provide rest area at every 9.0m and each change in direction. Handrails and kerbs both sides.</li> <li>d) Gradients greater than 1:20 allow more generous allowances for horizontal landing provisions.</li> </ul>	<p>AS1428.1 2009 Clause 10.3</p> <p>AS1428.4.1 2009 Clause 2.4</p>

Project Specific Comment
1. See comments in section 5.11 Spectator & Viewing Areas

## 5.10. Barbecue & Cooking Facilities

The design and placement of outdoor cooking facilities should allow everyone to cook and share a meal together.

### Objectives

1. Barbeques and cooking facilities should include:
2. controls that are easy to see and use at the front of the hot plate
3. controls that can be used with a closed fist or open palm
4. controls that incorporate raised tactile and braille elements
5. hot plates that can be reached by a person when standing or seated, and

6. some low height benches with adequate leg clearance underneath, adjacent to the barbecue hot plate.	
Compliance Metric	Reference
1) The top of the low height bench space should be at a height between 830 – 870mm above the floor or ground level with leg clearance at a height of 800 – 840mm underneath for minimum of 900mm.	Sports and recreation Victoria 2015 Design for Everyone Guide
2) Appropriate reach ranges and controls should be incorporated in accordance with AS1428. 2 Clauses 22 and 23.	AS1428.2 1992
3) Consideration should be given to size and location of the hard surface on which the cooking facilities are located, to ensure that over time trip hazards do not arise where heavy wear of grass surfaces in the immediate vicinity causes a substantial drop in height between the hard surface and the grass.	Clauses 22 and 23

### 5.11. Spectator & Viewing Areas

Spectator and viewing areas can include:

- **Formal spectator areas** that are designed for the primary purpose of spectating and are defined as spectator spaces. These include platforms without seating or stadia style seating.
- **Informal viewing areas** that provide opportunity for spectating, but have other uses. Examples include integrated amphitheaters or bleacher style seating.

#### Objectives

All formal spectator areas and informal viewing areas:

1. will be connected to a continuous accessible path of travel from the site entry
2. will be located off the continuous accessible path of travel, so they don't create an obstruction to path users
3. will be on an accessible surface
4. will provide clear lines of sight to activities, events or a scene being viewed, and
5. should incorporate shade and shelter over at least part of permanent viewing and spectator areas that are located outdoors.

Where formal spectator areas include seating:

1. Seating will not obstruct the continuous accessible path of travel.
2. Where there is seating in rows, adequate space between the rows will be provided to allow people to easily move through.
3. Accessible seating spaces will be available in a variety of equitable locations throughout the formal spectator area. These will allow wheelchair users, families with prams or a person using an assistance animal to sit together with friends and family.
4. An appropriate kerb and handrails will be provided on any raised viewing platform to prevent people from falling or rolling over an edge.
5. A hearing augmentation system is provided where an inbuilt amplification system is used.

Where informal viewing areas are provided:

1. Bleacher style seating will be designed to be distinguishable from stairs and incorporate appropriate design features to minimise risk to people who are blind or have low vision.

Compliance Metric	Reference
<b>Formal spectator areas and informal viewing areas</b>	Australian Human Rights Commission 2013 Advisory Note on Streetscapes, public outdoor areas, fixtures, fittings and furniture Clause 8.2.2 AS1428.1
1) A continuous accessible path of travel will be provided from the site entry to and through any formal spectator areas and informal viewing areas. a) See 2.1 for detailed criteria of a continuous accessible path of travel. b) If a ramp is required, appropriate turning points and handrails will be provided in accordance with AS1428.1 Clause 10 and 11.	
2) All formal spectator areas and informal viewing areas should include a hardstand area to allow people who use wheelchairs to spectate.	Sports and Recreation Victoria 2015 Design for Everyone Guide
3) All formal spectator areas and informal viewing areas should be set back by a minimum of 500mm from the continuous accessible path of travel.	
4) All formal spectator areas and informal viewing areas should provide clear lines of sight to activities, events or a scene being viewed, including for people who need to remain seated, in areas where viewing is predominantly undertaken by people who are standing.	Sports and Recreation Victoria 2015 Design for Everyone Guide
5) Where formal spectator areas with seating are provided, seating will not obstruct the continuous accessible path of travel. a) Seating shall be set back by a minimum of 500mm away from the path of travel.	AS1428.2 1992 Clause 27
6) Consideration should be given to the provision of shade and shelter over parts of the formal spectator areas and informal viewing areas that are located outdoors.	Sports and Recreation Victoria 2015 Design for Everyone Guide
<b>Formal Spectator Areas</b>	Disability (Access to premises – Building) Standards 2010
7) Seating in formal spectator areas, should include back rests and arm supports in a minimum of 25% of spaces should provide: a) arm rests at a height between 220mm and 300mm above seat b) a minimum of 1000mm space between rows of seating in viewing areas as far as possible. Where this is not feasible, a minimum of 1000mm in areas that provide access to allocated wheelchair seating spaces must be provided c) additional space available next to seating for assistance animals, prams, or other items.	
8) Wheelchair spaces will be a minimum of 850mm wide (800mm acceptable if located at the end of a row) and a minimum of 1250mm deep.	
9) Formal spectator areas will include appropriate number and distribution of spaces to accommodate wheelchair users as defined by the Disability (Access to Premises - Building) Standards (2010) for class 9b Buildings.	
10) An appropriate kerb and handrail should be provided on any raised viewing platform to prevent people from falling or rolling over an edge.	AS1428.1 Clause 10.3 (j) and 12

<ul style="list-style-type: none"> <li>a) A minimum 150 mm kerb on raised viewing platforms where required for safety.</li> <li>b) Appropriate handrails will be provided in accordance with AS1428.1 Clause 10.3 and 12. Care will be taken to ensure rails do not obstruct sight lines, including for people who are not able to stand.</li> </ul>	
<ul style="list-style-type: none"> <li>11) Where a public-address system is installed, a hearing augmentation system should be provided.</li> <li>12) The system should cover 80% of the floor area served by inbuilt amplification or 95% of the space if a system using receivers or the like is in use.</li> </ul>	Sports and Recreation Victoria 2015 Design for Everyone Guide
<p><b>Informal viewing areas</b></p> <ul style="list-style-type: none"> <li>13) Where stairs are incorporated within integrated seating for example bleacher seating: <ul style="list-style-type: none"> <li>a) TGSIs shall only be included at the top and bottom of the stair component – not at the top and bottom of the any other integrated elements, such as seating – so that people who are blind or have low vision do not confuse the bleacher for stairs and can easily identify a safe place to descend/ascend stairs.</li> <li>b) Stairs shall be easily discernible from surrounding bleacher seating and have defined and consistent edging. This can be achieved through: <ul style="list-style-type: none"> <li>(i) the use of contrasting materials for the stairs and seating (minimum 30% luminance contrast), and</li> <li>(ii) defined edges, and/or</li> <li>(iii) luminance contrasting strips on the nose of the bleacher seating, in addition to those required on the nose of the stair riser. Both minimum 30% luminance contrast.</li> </ul> </li> <li>c) Additional elements should be put in place to prevent people who are blind or have low vision from stepping off the top bleacher. These can include, but are not limited to: <ul style="list-style-type: none"> <li>(i) barriers</li> <li>(ii) seating</li> <li>(iii) planting.</li> </ul> </li> </ul> </li> <li>14) Integrated seating such as bleacher style seating should consider the provision of the following: <ul style="list-style-type: none"> <li>a) backrests and arms rests for some of the seating element</li> <li>b) additional space available next to seating for assistance animals, prams, or other items.</li> </ul> </li> </ul>	<p>Additional Guidance</p> <p>AS1428.2 Clause 27.1 (b)</p>

## Fixed Seating Ratio

Number of <u>fixed seats</u> in a room or space	Number of wheelchair seating spaces	Location & Grouping
Up to 150	3 spaces	1 single space; and 1 group of 2 spaces
151 to 800	3 Spaces plus 1 additional space for each additional 50 seats or part thereof in excess of 150 seats	Not less than 1 single space; and not less than 1 group of 2 spaces; and not more than 5 spaces in any other group
801 to 10,000	16 spaces plus 1 additional space for each additional 100 seats or part thereof in excess of 800 seats	Not less than 2 single spaces; and not less than 2 group of 2 spaces; and not more than 5 spaces in any other group; and the location of the spaces is to be representative of the range of seating provided
More than 10,000	108 spaces plus 1 additional space for each additional 200 seats or part thereof in excess of 10,000 seats	Not less than 5 single spaces; and not less than 5 group of 2 spaces; and not more than 10 spaces in any other group; and the location of the spaces is to be representative of the range of seating provided

### Project Specific Comment

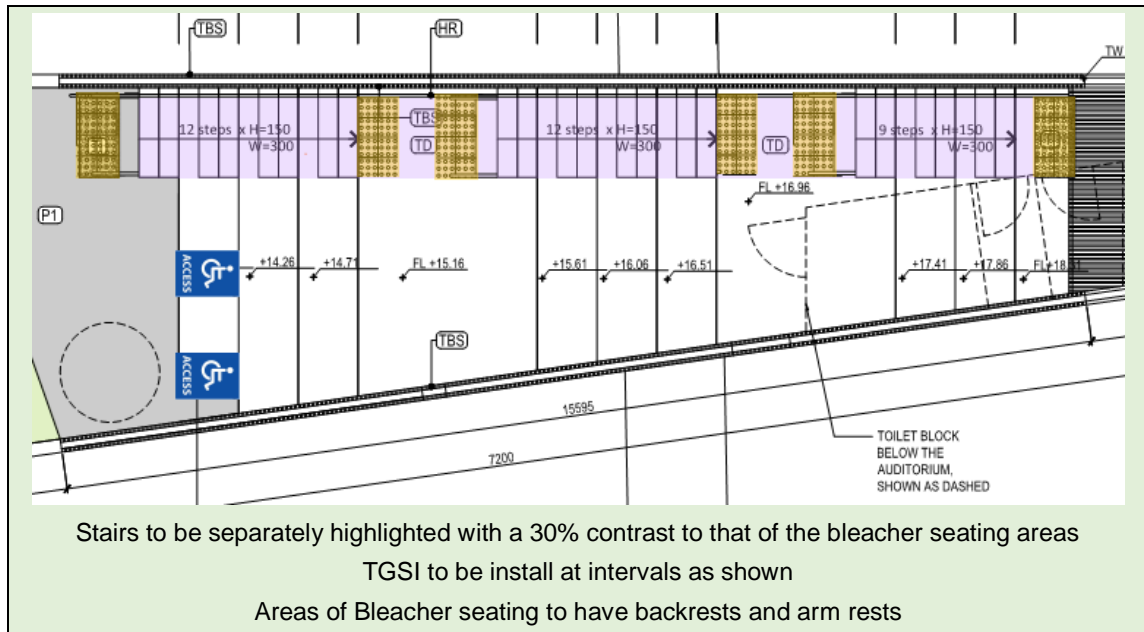

1. Bleacher area should be nominated as an "Informal Viewing Area" to satisfy compliance with wheelchair provisions.
2. Although Informal allocation should be made for wheelchair seating 850 wide x 1250 deep and adjacent to regular seating
3. 20% of the areas of bleacher seating to be provided with backrests and handrails
4. Stairs to be separately highlighted with 30% contrasting difference to informal seating area of bleachers.
5. TGSi to be installed at the top and bottom of every stair flight

Allocated wheelchair spaces

## 5.12. Public Toilets

Public toilets are essential facilities for all residents, workers and visitors to participate in community life. Convenient and accessible toilets enhance people's freedom to travel. These facilities improve quality of life, accessibility, and dignity for all people and particularly for people with disability or health problems, older people and families with young children.

### Objectives

1. New public toilets will be designed to be accessible and inclusive of people of all ages, abilities, gender and non-binary identities to secure confidence, dignity, safety and independence.
2. They will be connected to a continuous accessible path of travel.
3. Dignified access for all users is secured by providing a range of unisex, gender specific and non-binary facilities across the public toilet network.
4. Both left hand and right hand transfer arrangements for accessible facilities are to be provided across the public toilet network.
5. Visitors will be able to access the facilities.
6. The facilities will be easily located.
7. Opening hours are to be clearly displayed and operating hours should be reflective of the demand.

**Note:** Where out of hours access may be required or security is a concern reference should be made to the installation of the MLAK (Master Locksmiths Association Key) toilet key system for accessible toilets. This allows registered users to obtain a key for access out of hours.

Compliance Metric	Reference
1) All new public toilets will include accessible toilets compliant with AS1428.1 (2009), in particular clauses 13, 15, 16 and 17.	AS1428.1 2009 Clauses 13, 15, 16 and 17

2) Toilet facilities should not be located in an area where a gradient less than 1:20 is required to the connecting continuous accessible path of travel.	AS1428.1 2009
3) Where the gradient of the path of travel to the toilet facility is less than 1:20, handrails and TGSIs will be required on external access ramps in compliance with AS1428.1. 4) Where more than two accessible toilet facilities (or cubicles) are provided, a mix of left hand (LH) and right hand (RH) transfer will be employed. 5) Where gender cubicles are to be provided in addition after the provision of an accessible toilet facility. A gender specific "Ambulant" toilets are to be included in the first instance. 6) At locations with only one accessible toilet – consideration will be given to the transfer-side arrangements of nearby facilities. 7) Consideration should be given to door opening, and where practicable, automated doors will be provided. Fixtures, fittings and signage will reflect best practice inclusive access including child friendly features where appropriate, for example, at parks.	Best practice
8) Taking into consideration the needs of the local community, nearby facilities, venues, amenities and the like Consideration is to be given to the availability of unisex, gender specific and non-binary facilities of to ensure safe and dignified access for all users.	Best practice

#### Project Specific Comment

1. The design shows an accessible toilet, ambulant toilet and a general toilet  
BCA Provisions require the installation of a unisex accessible toilet and male and female ambulant toilets Unisex ambulant toilets are not permitted as a Deemed to Satisfy Solution and will require a preparation of a Performance Solution.
2. Internal measurements of accessible cubicle specified in AS1428.1 is to be the minimum internal clear floor area of all linings. The scaled measurements show the internal measurements of the cubicle to be 1850mm x 2450mm. This floor area is not compliant with AS1428.1
3. Door circulation space inside the access cubicle is obstructed by the hand basin
4. Single unisex ambulant toilet as shown is too small. Male and female ambulant toilets required and increased circulation space inside and out side of toilet required.

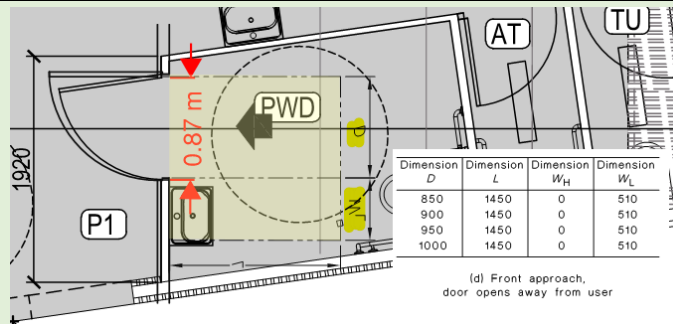

Minimum width of cubicle to be 1900mm clear of ALL internal linings (Plaster Tile or Like)

Door circulation space at doorway entering cubicle is compliant

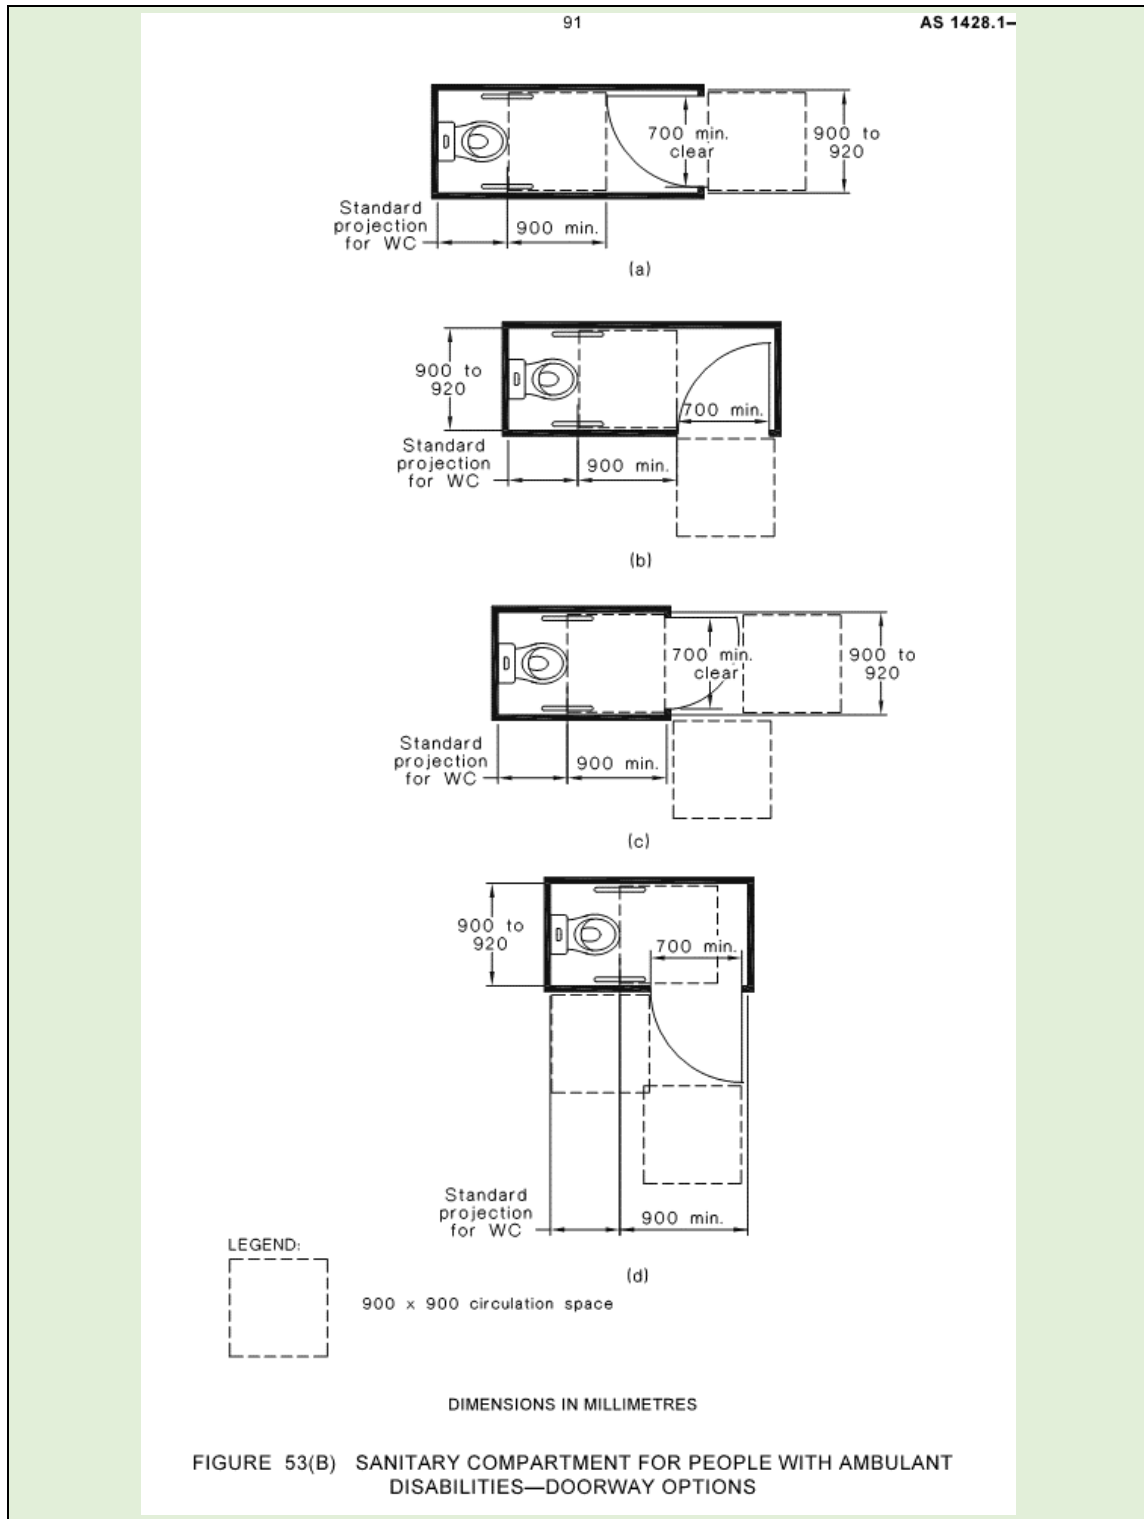

Door circulation space inside the cubicle is obstructed by the hand basin and NON COMPLIANT

Single unisex ambulant toilet as shown is too small. Male and female ambulant toilets required and increased circulation space inside and out side of toilet required

### 5.13. Green Spaces, Street Trees, Garden Verge, and the like

Green spaces street trees, garden verges and other planting on the street beautify and soften streetscapes, provide wildlife habitat and play a significant role in determining the character of the space.

Trees are critical in the maintenance of a healthy environment as they produce oxygen, trap airborne pollutants absorb carbon dioxide, provide shade and reduce the heat island effect.

#### Objectives

1. Streetscapes should be designed so that green spaces street trees, garden verges and other greening elements do not obstruct the continuous accessible path of travel.
2. Elements on the streetscape, including street trees, will be coordinated to minimise pinch points.
3. Tree pit surfaces will be level with surrounding paving.
4. Where tree guards are used they will be visually detectable to all users with a 30% luminance contrast.
5. Where garden verges and other street greening areas requires mulch, the mulching material will be chosen to avoid potential slip and trip hazards

Compliance Metric	Reference
<p>1) Street trees and garden verges will be located within the street furniture zone of the footpath so as not to obstruct the continuous accessible path of travel. In particular:</p> <ol style="list-style-type: none"> <li>a) A minimum 600mm from the kerb edge.</li> <li>b) A minimum of 1200mm clearance from the edge of the tree pit to the boundary of the building will be provided, as far possible.</li> <li>c) In circumstances where footpaths are less than 1800mm wide, or where the location or size of existing trees warrant, a minimum clearance of 900mm between the back of the tree pit and building/boundary line will be accepted. In these circumstances, the following conditions must be met: <ol style="list-style-type: none"> <li>i) that there are no obstructions overhanging the building line and encroaching onto the footpath from the front yard of the adjacent property (e.g. shrubs and vines)</li> <li>ii) that the lower branches of the tree can be pruned to a height of at least 2000mm, and</li> <li>iii) consideration will be given to the placement of other infrastructure on the street. A 900mm width clearance should be of no greater length than 1500mm. Beyond that, regular passing opportunities of 1800mm should be provided as far as possible to minimise pinch points.</li> </ol> </li> </ol> <p>2) As far as is possible, the tree pit surface will be installed level with surrounding paving, leaving surface roots exposed where necessary.</p> <p>3) In high pedestrian areas, resin bond will be used on tree pits to minimise risk of trip hazards resulting from loose soil, gravel or bark.</p> <p>4) Permanent tree guards will have minimum 30% luminance contrast with surrounding paving materials</p>	<p>Australian Human Rights Commission 2014 Frequently asked questions: Access to premises: What is an accessible footpath?</p>
<p>5) Where garden verges or gardens in kerb extensions require mulch, the use of loose hard pebbles should be avoided.</p>	<p>Best Practice</p>

## 6.0...Conclusion

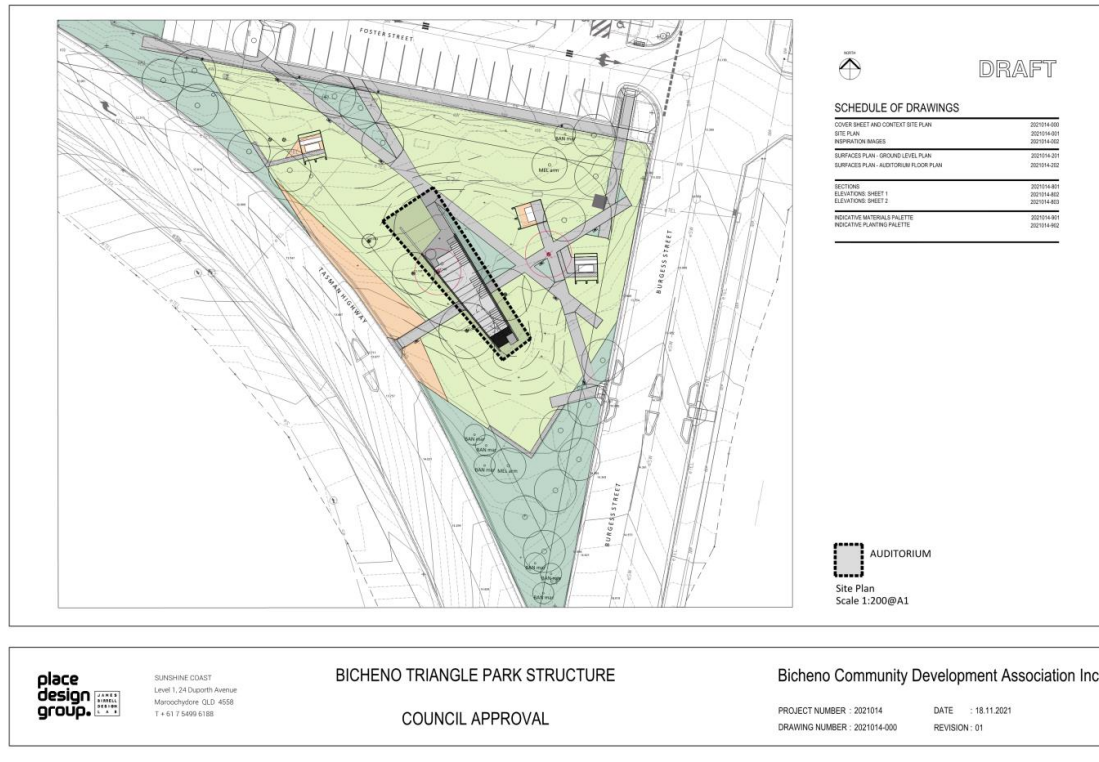

The proposed development is likely to satisfy the Access with dignity metric established in the Disability Discrimination Act 1992 if the design has considered the above report and implemented the controls within the design.

The development is likely to provide substantive equal access for the 80 to 90 percentile and is unlikely to have an adverse effect on the safety health or amenity of people with a disability using the facilities.

### Wielangta Road sealing feasibility

Dear Greg

I refer to my letter dated 26 July 2021 regarding the on-going management of Wielangta Road and the Tasmanian Government's intention to explore the feasibility of sealing the road following the temporary closure of the Tasman Highway at Paradise Gorge.

The Department of State Growth has now commenced a preliminary assessment of options and costings but also wishes to gauge the views and preferences of the various owners. Some of the owners have since responded to my previous letter but we had not heard further from Council. Does Glamorgan Spring Bay Council have any comments it wishes to contribute to the discussion at this time?

Once the views of the owners and results of the assessment are at hand, the Department will advise on the outcomes and again seek your input.

If you have any further questions, please contact Darren McConnon, Project Manager on 6166 3452 or via email on [darren.mcconnon@stategrowth.tas.gov.au](mailto:darren.mcconnon@stategrowth.tas.gov.au).

Yours sincerely

Denise McIntyre
