1 Introduction

1.1 Purpose

This policy sets out the principles by which Council manages or modifies the unsealed road network for which it is responsible.

Council currently maintains approximately 200km (nominally) of depreciable unsealed road network and, in accordance with various provisions within the Local Government (Highways) Act 1982, has powers for the determination of management of all Local Highways within the Glamorgan Spring Bay Municipal area.

Scope

This policy applies to all unsealed roads, both formed and unformed, throughout the Local Government Area (LGA) and vested in council. The scope of this policy includes the management of Council's unsealed road network within the bounds of Council's available resourcing.

This policy does not include the management of Crown, Parks & Wildlife, Forestry and other non-council roads.

1.2 Definitions

Council	is Glamorgan Spring Bay Council
Unsealed Road	is a formed road without an impervious bitumen, paver or concrete wearing surface
Unformed Road	is a road reserve with no earth formation to manage vehicular movement or drainage
Public Road	is a road formed and dedicated for public use

1.3 Objectives

- a) The policy seeks to provide information to the general public on how council classifies and manages or modifies its unsealed road network.
- b) The policy establishes consistent principles and practices for the management of this extensive and important asset class.

1.4 Related Policies and Legislation

This policy relates to and depends on other Council policies, as well as legislation, including:

- Roads & Jetties Act (1935)
- Local Government Highways Act (1982)
- Local Government Act (1993)
- Work Health and Safety Act (2012)
- Work Health and Safety Regulation (2012)
- Land Use Planning and Approvals Act (1993)

Council has the duty of maintaining the local highways in the municipality that are maintainable by the corporation as shown on its municipal map in accordance with the Local Government Highways Act 1982, S21.

- Tasmanian Municipal Standards Specifications and Drawings

1.5 Policy Review and Update Cycle

This policy is to be reviewed every four years.

2 Policy

- a) Unsealed roads will be allocated into the following classifications:
 - Link Roads
 - Collector Roads
 - Local Access Roads
 - Limited Local Access Roads

- b) Unsealed roads shall be classified based on the following criteria:
 - network and community connectivity.
 - traffic volumes
 - number of premises accessed
 - school bus routes
 - regional tourism value
 - regional economic value

- c) The road classification will be used in council’s road maps, available to the public and will be used to determine maintenance priority and frequency.

- d) Roads not designated as council maintained on Council roads maps will not be maintained at council’s cost.

- e) Existing low use sealed roads may be reconstructed to remove the seal layer, on a decision of council, and included in the unsealed road classification following a review of the Whole of life cost of the asset’s management and other risk factors.

- f) Upgrading an unsealed road to incorporate an impervious sealed wearing surface will occur under three circumstances:
 - a. on a decision of council in accord with the principles of asset management practice and financial management. The Whole of Life Cost for the change in asset performance will be considered. Such consideration may incorporate the inclusion of a contribution to the cost of the works from a resident, landowner or occupier serviced by the road. Consideration may include for dust or maintenance reduction.
 - b. Where a development application makes the upgrade of the road useful to the community and there is an appropriate contribution from an approved land development.
 - c. Where the State of Federal Government makes an overarching determination and provides funding.

- g) Maintenance regimes for this asset class will be established through an associated Unsealed Roads Procedure.

h) Council will not accept the transfer of private roads or assets, unless required through conditions of development consent or other legislated mechanism which may include a determination of council.

i) Installation of Cattle Grids and Public Gates: Council may consider applications from an adjoining owner(s) where there is no adverse effect upon current or potential road users or other adjoining properties.

Supply/Installation and maintenance of a cattle grid(s) or a public gate(s) is solely the responsibility of the benefiting landowner(s).

Council shall only consider applications for the erection of a Public Gate(s) on a Local or Limited Access Road when applied for by the last property owner at the end of a no through road. Council, at its sole discretion, may alter the road Classification and lower or cease provision of a Level of Service beyond the Public Gate subject to the consent conditions. (this provision is not retrospective)

Driveways/Road Crossings: Maintenance and upkeep of driveways / road crossings (including pipe crossings) and crossovers is entirely the responsibility of the benefiting landowner(s).

2 Implementation

Implementation of this Policy rests with the General Manager.
